

# TOMORROW'S PROTECTION TODAY

Your Guide to  
Security Software That  
Doesn't Get in the Way of Business

80 million people trust us to keep them safe online – and so can you.

# WHY AVG?

When your employees go online, they're indirectly connecting with hundreds of millions of other users via the Internet. That alone poses a big threat to the security of your business data – never mind the disruption that comes from a virus infection that puts your network out of commission for hours, even days.

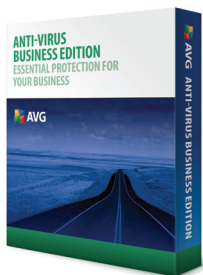

At AVG, we remember what it was like to be a small business, worried about security. So we understand just how daunting it can be, especially when considering how much more complex the world of computers has become.

That's why AVG business security software takes care of all aspects of security on your small business network – web threats, virus threats, identity theft threats, and more – keeping your staff productive and your network safe from unauthorised access. We have solutions for Windows networks, file and mail servers, and for Linux networks. Whatever your business security needs, AVG has a solution for you.

# AVG ANTI-VIRUS BUSINESS EDITION 9.0

## ESSENTIAL PROTECTION FOR YOUR BUSINESS

You wouldn't let an uninvited guest into your office, so don't let electronic intruders get access to your network while you're not looking. Your business computers need protection that's always there, constantly keeping your valuable business data safe.

- ✓ **NEW** high-performance virus scanner for great protection that doesn't get in the way of business
- ✓ **ENHANCED** protection against phishing attacks keeps your employees from clicking on unsafe links
- ✓ **ENHANCED** firewall works in the background to keep hackers out without interrupting business
- ✓ **NEW** Linux-based Rescue CD makes sure your network can be recovered from a serious existing infection
- ✓ **ENHANCED** centralised management with automated updates, remote repair and security policy enforcement

**AVG Anti-Virus Business Edition 9.0** also includes LinkScanner® safe surf and search technology to prevent your employees from inadvertently introducing web-based threats into your network.

#### Minimum System Requirements

Pentium Processor 1.5 GHz  
 450 MB free hard drive space  
 (for installation)  
 512 MB RAM

#### Recommended System Requirements

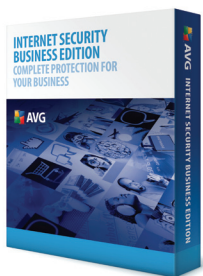

Pentium Processor 1.8 GHz  
 550 MB free hard drive space  
 (for installation)  
 512 MB RAM

*Note: The WebShield and Firewall modules are intended for desktop use. We don't recommend you install them on servers.*

# AVG INTERNET SECURITY BUSINESS EDITION 9.0

## COMPLETE PROTECTION FOR YOUR BUSINESS

AVG Internet Security Business Edition 9.0 is designed to protect your workstations and servers so you can focus on your business.

- ✓ **NEW** Data Protection module ensures safe online business transactions by adding a vital extra security layer of protection against unknown threats
- ✓ **NEW** high-performance virus scanner provides great protection without getting in the way of business
- ✓ **ENHANCED** protection against phishers and server-based spam keeps your email system running smoothly
- ✓ **ENHANCED** firewall works in the background to keep hackers out without interrupting business
- ✓ **NEW** Linux-based Rescue CD makes sure your network can be recovered from a serious existing infection
- ✓ **ENHANCED** centralised management with automated updates, remote repair and security policy enforcement

**AVG Internet Security Business Edition 9.0** further enhances protection against new and unknown threats coming over the web by combining several of these elements behind-the-scenes. The new Data Protection module works cooperatively with and the LinkScanner® safe surf/safe search module, the enhanced firewall and new high-performance scanner to deliver cutting-edge technologies like white-listing and “in-the-cloud” automated testing to definitively identify the presence of a new threat.

# AVG FILE SERVER EDITION 9.0

## ESSENTIAL PROTECTION FOR YOUR FILE SERVER

Award-winning anti-virus and anti-spyware protection for Windows file servers to prevent viruses and other threats from spreading across your network. If you already have virus protection on your workstations but don't have protection for the critical business data on your server, this is the solution for you. AVG File Server Edition 9.0 also includes key additional technology to protect your server against threats from unsafe websites.

- ✓ **NEW** high-performance virus scanner gives you great protection without getting in the way of business
- ✓ **LinkScanner**® ensures critical data on your server is safe from malicious websites
- ✓ **ENHANCED** protection against phishing attacks prevents damage from clicking on unsafe links
- ✓ **ENHANCED** centralised management with automated updates, remote repair and security policy enforcement

**AVG File Server Edition 9.0** is terminal server enabled and priced according to the number of connections - the number of licences is determined by the total number of connections to the server. One or two-year subscriptions are available.

# AVG EMAIL SERVER EDITION 9.0

## ESSENTIAL PROTECTION FOR YOUR EMAIL SERVER

Award-winning anti-virus and anti-spyware protection for Windows mail servers to prevent viruses and other threats from spreading through your email system. If you already have virus protection on your network but don't have protection for the critical data traveling through, and stored on, your mail server, this is the solution for you. AVG Email Server Edition 9.0 also includes central anti-spam controls and key additional technology to protect your mail server against threats from unsafe websites.

- ✓ **NEW** high-performance virus scanner protects your mail system and certifies your emails as virus-free
- ✓ **LinkScanner**® ensures critical data on your server is safe from malicious websites
- ✓ **ENHANCED** protection against phishing attacks prevents damage from clicking on unsafe links
- ✓ **NEW** centralised anti-spam controls for network-wide application of anti-spam policies
- ✓ **ENHANCED** centralised management with automated updates, remote repair and security policy enforcement

**AVG Email Server Edition 9.0** is priced according to the number of mailboxes - the number of licences is determined by the total number of mailboxes on the mail server. One or two-year subscriptions are available.
