Security Configuration

- ▣ Service accounts
- ▣ Information Rights Management
- ▣ Antivirus
- ▣ Blocked file types
- ▣ Update farm administrator's group
- ▣ Information management policy configuration
- ▣ Manage settings for single sign-on

Central Administration > Operations > Antivirus

Antivirus

Use this page to configure settings for virus scanning. You must install virus scanning software on all Web servers that are hosting documents before these settings can take effect. [Learn about configuring antivirus settings.](#)

Antivirus Settings

Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents.

- Scan documents on upload
- Scan documents on download
- Allow users to download infected documents
- Attempt to clean infected documents

Antivirus Time Out

You can specify how long the virus scanner should run before timing out. If server response time is slow while scanning, you may want to decrease the number of seconds.

Time out duration (in seconds):

Antivirus Threads

You can specify the number of execution threads on the server that the virus scanner may use. If server response time is slow while scanning, you may want to decrease the number of threads allowed for virus scanning.

Number of threads:

OK

Cancel

AVG for SharePoint Portal Server

Security Configuration

Use these links to update the security options which impact all virtual servers, and to add, update, or change user information for a single top-level Web site.

- ▣ [Set SharePoint administration group](#)
- ▣ [Manage site collection owners](#)
- ▣ [Manage Web site users](#)
- ▣ [Manage blocked file types](#)
- ▣ [Configure antivirus settings](#)

Windows SharePoint Services Configure Antivirus Settings

Use this page to configure settings for virus scanning. You must install virus scanning software on all Web servers that are hosting documents before these settings can take effect. [Show me more information.](#)

Antivirus Settings

Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents. You can also specify how long the virus scanner should run before timing out, and the number of execution threads on the server that it may use. If server response time is slow while scanning, you may want to decrease the number of seconds and threads allowed for virus scanning.

- Scan documents on upload
- Scan documents on download
- Allow users to download infected documents
- Attempt to clean infected documents
- Time out scanning after seconds
- Allow scanner to use up to threads

OK Cancel
