Windows SharePoint Services
Configure Antivirus Settings

Use this page to configure settings for virus scanning. You must install virus scanning software on all Web servers that are hosting documents before these settings can take effect. [Show me more information.](#)

Antivirus Settings

Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents. You can also specify how long the virus scanner should run before timing out, and the number of execution threads on the server that it may use. If server response time is slow while scanning, you may want to decrease the number of seconds and threads allowed for virus scanning.

Scan documents on upload

Scan documents on download

Allow users to download infected documents

Attempt to clean infected documents

Time out scanning after seconds

Allow scanner to use up to threads

OK

Cancel

MS SharePoint 2007 Server

Central Administration > Operations > Antivirus

Antivirus

Use this page to configure settings for virus scanning. You must install virus scanning software on all Web servers that are hosting documents before these settings can take effect. [Learn about configuring antivirus settings.](#)

Antivirus Settings

Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents.

- Scan documents on upload
- Scan documents on download
- Allow users to download infected documents
- Attempt to clean infected documents

Antivirus Time Out

You can specify how long the virus scanner should run before timing out. If server response time is slow while scanning, you may want to decrease the number of seconds.

Time out duration (in seconds):

Antivirus Threads

You can specify the number of execution threads on the server that the virus scanner may use. If server response time is slow while scanning, you may want to decrease the number of threads allowed for virus scanning.

Number of threads:

OK

Cancel
