1. Introduction

This user manual offers a general overview of the tasks and detection technologies provided by **AVG Identity Protection**. We will briefly talk about the program installation, initial startup, and use.

AVG Identity Protection is focused on preventing identity thieves from stealing your passwords, bank account details, credit card numbers and other personal digital valuables from all kinds of malicious software (*malware*) that target your PC. It makes sure that all programs running on your PC are operating correctly. **AVG Identity Protection** spots and blocks suspicious behavior on a continuous basis and protects your computer from all new malware.

AVG Identity Protection is an anti-malware application that protects you from all kinds of malware (*spyware, bots, identity theft, ...*) using behavioral technologies and provide zero day protection for new viruses. As malware gets sophisticated and comes in a form of normal programs that can open up your PC to the remote attacker for identity theft, **AVG Identity Protection** secures you from these new execution based malware.

AVG Identity Protection is a complimentary protection to **AVG Anti-Virus** that protects you from file based and known viruses using signature mechanism and scanning.

We strongly recommend you have the both AVG Anti-Virus and AVG Identity Protection applications installed, in order to have complete protection for your PC.

2. Installation Requirements

In the chart bellow find an overview of supported operating systems and respective minimum hardware requirements for **AVG Identity Protection** installation:

Operating System	Windows XP Pro or Home SP2 or above	Windows Vista 32bit	Windows Vista 64bit	Windows 7 32bit	Windows 7 64bit
Service Pack	SP 2 and above	all	all	N/A	N/A
Processor	Pentium 4	Vista Capable	Vista Premium Ready	Pentium 4	Pentium 4
Clock Speed	600 MHz	800 MHz	1 GHz	1 GHz	1 GHz
Memory	512 MB RAM	1 GB MB RAM	1GB RAM	1 GB RAM	1 GB RAM
Free Disk Space	50 MB	50 MB	50 MB	50 MB	50 MB

3. Installation Process

3.1. Installation Options

To download the installation file of **AVG Identity Protection** please visit AVG website at <u>www.avg.com</u> and follow the <u>Support Center/Download</u> section. Once you have downloaded and saved the installation file on your hard disk, you can launch the installation process. The installation is a sequence of dialog windows with a brief description of what do at each step. In the following, we offer an explanation for each dialog window:

3.2. Installation Language

Choose	Setup language 🛛 🔀		
Select the language for this installation from the choises below			
	English (United States)		
	OK Storno		

Having executed the **AVG Identity Protection** installation file you will be invited to select the setup language. This selection only applies to the installation process. For the application itself you can select the respective language later within the **AVG Identity Protection** configuration (*Settings tab*).

3.3. Installation Launch

The installation process starts with the *Welcome to the AVG Setup Program* window. This dialog does not require any intervention. Please press the *Next* button to continue to the next step.

3.4. License Agreement

🛃 AVG Identity Protection - InstallShield Wizard 🛛 🛛 🔀
License Agreement Please read the following license agreement carefully.
IMPORTANT: READ THIS AGREEMENT CAREFULLY. THIS IS A LEGAL AGREEMENT BETWEEN AVG TECHNOLOGIES CY, Ltd. ("AVG TECHNOLOGIES") AND YOU (ACTING AS AN INDIVIDUAL OR, IF APPLICABLE, ON BEHALF OF THE INDIVIDUAL OR ENTITY ON WHOSE COMPUTER THE SOFTWARE IS INSTALLED). IF YOU CLICK THE "ACCEPT" OPTION OR INSTALL THE SOFTWARE PRODUCT ACCOMPANYING THIS AGREEMENT (THE "SOFTWARE") YOU WILL BE BOUND BY THIS AGREEMENT. You are not required to VILL BE BOUND BY THIS AGREEMENT. You are not required to VILL BE BOUND BY THIS AGREEMENT. You are not required to VILL BE BOUND BY THIS AGREEMENT. < <u>Back</u> <u>Next</u> > Cancel

The *License Agreement* dialog provides the full wording of the **AVG Identity Protection** license agreement. Please read it carefully and confirm that you have read, understood and accept the agreement by marking the *I accept the terms in the license agreement* check box and pressing the *Next* button.

If you do not agree with the license agreement (*I do not accept the terms in the license agreement*), the installation process of **AVG Identity Protection** will be terminated.

3.5. Customer Information

🗒 AVG Identity Protection - InstallShield Wizard	
Customer Information	📕 AVG
Please enter your email address (optional)	
Your information is confidential and will not be shared.	
InstaliShield	
< <u>B</u> ack <u>N</u> ext >	Cancel

In the **Customer Information** dialog you can fill in your e-mail address (*providing this information is optional*) that serves only for the purpose of faster communication with AVG technical support team and will not be used for marketing purposes neither in any other way.

3.6. Destination Folder

😼 AVG Ide	ntity Protection - InstallShield Wizard	×
Destinati	on Folder	AVG
Click Ne>	t to install to this folder, or click Change to install to a different folder.	
	Install AVG Identity Protection to:	
	C:\Program Files\AVG\Identity Protection\	⊆hange
TestellChield		
unscanorneid -	< <u>B</u> ack Next >	Cancel

The **Destination Folder** dialog allows you to specify the location where **AVG Identity Protection** should be installed. By default, **AVG Identity Protection** will be installed to the program files folder located on drive C:. If you want to change this location, use the **Change** button to display the drive structure, and select the respective folder.

Press the *Next* button to confirm, and to continue to the next step.

3.7. Installation Ready

🛃 AVG Identity Protection - InstallShield Wizard	×
Ready to Install the Program The wizard is ready to begin installation.	🕌 AVG
Click Install to begin the installation.	
If you want to review or change any of your installation settings, click Back. C exit the wizard.	lick Cancel to
Toctal/Shield	
< <u>B</u> ack Install	Cancel

At this point, the installation is ready to be launched. To start the installation process please press the **Install** button. The following dialog appears to display the progress of the installation process:

😸 AVG Ide	entity Protection - InstallShield Wizard 📃 🗔	X		
Installing	AVG Identity Protection 😽 🗛	G		
The prog	gram features you selected are being installed.			
17	Please wait while the InstallShield Wizard installs AVG Identity Protection. This may take several minutes.			
	Status:			
InstallShield –				
	< <u>B</u> ack <u>N</u> ext > Cancel			

The dialog does not require any further intervention. Please wait for a moment. Once the installation is finished, you will be automatically redirected to the following step.

3.8. Installation Completed

🛃 AVG Identity Protection - InstallShield Wizard 🛛 🔀			
AVG	InstallShield Wizard Completed		
L	The InstallShield Wizard has successfully installed AVG Identity Protection. Click Finish to exit the wizard.		
	Ves, launch protection now.		
XX	✓ Show Welcome Page		
	< Back Finish Cancel		

Your **AVG Identity Protection** installation is now completed and configured for optimum performance. During the **AVG Identity Protection** installation process you were not asked to provide a valid licence number, and you have now 15 days to try the product for free. In the pop-up dialog pl4ease select whether you want to **Try** the product first, or you would like to **Buy** it right away, or you have your licence purchase already - if so, please press the **Enter License** button:

License About To Expire
AVG
Product Configuration: Try or Buy?
Your AVG Identity Protection evaluation will expire in 15 days.
AVG Identity Protection monitors your system and prevents your personal identity and data from being compromised.
Buy Now Enter License Try

4. Access to User Interface

The **AVG Identity Protection** is accessible in several ways:

- double-click the AVG Identity Protection icon on the system tray
- from the menu Start/All Programs/AVG 8.5/Identity Protection/Control
 Center

AVG Identity Protection opens with this user interface:

5. User Interface

The **AVG Identity Protection** user interface is divided into three tabs:

- <u>Status tab</u>
- <u>Settings tab</u>
- Advanced tab

5.1. Status Tab

The **Status** tab is graphically divided into several sections:

AVG Identity Protection			
AVG Identity Protection			
😡 Status 🛛 🗸 Settir	ngs 📄 Advanced 📀		
Protection: Enabled Stop	FULL LICENSE: 362 DAYS Get License Now Enter License		
Protection Status	Information Center (No messages)		
Malware Items Removed:0Processes Monitored:23Behaviors Monitored:308	AVG Identity Protection is constantly on guard, protecting your digital assets against new and unknown threats. AVG Identity Protection complements AVG's signature-based protection by monitoring the way programs behave on your PC, automatically blocking any activity that could lead to ID theft, without the need for updates.		

AVG IDP switch on/off and license info

The upper part of the dialog window informs you whether your **AVG Identity Protection** is currently running or switched off. (*Protection: Enabled/Protection: Disabled*). **AVG Identity Protection** is launched automatically immediately after the

installation process and it is not necessary to switch it on or configure manually. Of course, the option of switching the application off temporarily is available:

- Should you want to switch AVG Identity Protection off, press the Stop button
- To start the **AVG Identity Protection** activity again, press the **Start** button (*this new button appears once the application is switched off*)

However, we strongly recommend not to switch off the AVG Identity Protection application unless you have a true reason to do so! Otherwise you expose your computer to the malware attacks risk, and your AVG IDP is not able to protect you neither to warn you in any way!

In the same section of the dialog window you can also find information on the currently used license and its expiration date. There are two control buttons available:

• Get License Now - if you have first installed the trial version of AVG Identity Protection (valid for 15 days only) and you have decided to purchase the full version now, press the Get License Now button. You will get redirected to AVG website at <u>www.avg.com</u> with the possibility of buying the full version of AVG Identity Protection online.

Having purchased the full version of the application you will receive a valid license number. Use the *Enter License* button to register this new license number instead of re-installing the entire application:

• **Enter License** - press the button to open a new dialog where you can enter your newly purchase license number to register your **AVG Identity Protection** :

OK Car	icel
	OK Car

Protection Status

Within the *Protection Status* section you can see the statistic overview of all AVG **Identity Protection** activities:

- *Malware Items Removed* provides the number of all malicious programs (*including their possible components*) that have been removed and quarantined
- Processes Monitored provides the number of all processes that are currently running within your system
- Behaviors Monitored provides the number of those processes that AVG Identity Protection considers potentially dangerous and watches their behavior

Values of specific items will change in time, and also depending on your work with your computer.

Information Center

Within this section you will be able to read current information, news and warnings related to **AVG Identity Protection**.

5.2. Settings Tab

The **Settings** tab is further divided into three sections that can be displayed by clicking the respective button in the header of the dialog:

- Options
- **Quarantined**
- <u>Allowed</u>

5.2.1. Options

The **Options** tab is also graphically divided into several sections:

😐 AVG Iden	tity Protection	_ 🗆 🗙	
A	VG Identity Protection		
	🥥 Status 🛛 💎 Settings 📄 Advanced	0	
Optic	ons Quarantined Allowed		
	Automatically quarantine detected threats	Language	
	Prompt to save your work before removal	English 💌	
	Show progress of malware removal		
	Show final malware removal details		
	Automatically submit to AVG Labs		
	Minimize activity indicators	Save	
	icense: 7NJG7Z7N9T23L4UFCH8S (Full)	Enter License	
Configuration Version 242 Product Version 9 0 841 Check for Updates			
		Get Help Online	

Basic configuration

In the left part of the dialog you can see a list of options that can be switched on/off to define **AVG Identity Protection** behavior rules in case a suspicious activity is detected:

- **Automatically quarantine detected threats** (off by default) mark this item if you wish all applications detected as possible malware to be automatically and immediately moved to quarantine. Keeping the default settings, when a threat is detected, you will be asked whether it should be moved to quarantine to make sure no applications you want to run are removed.
- **Prompt to save your work before removal** (off by default) mark this item if you wish to be warn before the application detected as possible malware gets removed to quarantine. In case you just work with the

application, your project might be lost and you need to save it first. By default, this item is off since threats do not get removed automatically but should you allow this option of automatic removal (*the previous item in the list*), we strongly recommend to switch the "save your work prompt" as well!

- **Show progress of malware removal** (on by default) with this item on, once a potential malware is detected, a new dialog opens to display progress of the malware being removed to quarantine
- Show final malware removal details (on by default) with this item on, AVG Identity Protection displays detailed information on each object moved to quarantine (severity level, location, etc.)
- **Automatically submit to AVG Labs** (on by default) please keep this check-box marked to feed the database collecting information on malicious activity on the web and to help us identify new threats.
- *Minimize activity indicators* (*off by default*) the item refers to the number of processes watched by the **AVG Identity Protection** application. The list of those processes is displayed on the *Advanced* tab. Mark this item to decrease the amount of information provided to the necessary minimum.

Language selection

In the *Language selection* section you can choose a language of the application from the drop-down menu. At the moment, there are nine languages available. Confirm your choice by pressing the *Save* button.

Application version information

The bottom (*blue*) section of the dialog provides information on the **AVG Identity Protection** current license together with information on configuration and product version. There are three control buttons in the section:

• **Enter License** - having purchased the full version of **AVG Identity Protection** you receive the valid license number. Then use this button to enter the license into the newly opened dialog window. Then it is not necessary to reinstall the application with the new license:

• **Check for Updates** - press the button to verify existence of new update files. If there are new updates available, they will be downloaded and applied. Otherwise you will be informed that there are no new updates available.

Note: With AVG Identity Protection there is no need to schedule regular updates since this application does not rely on a recent virus database but rather detects dangerous behavioral patterns of running processes.

• **Get Help Online** - opens you web browser on AVG website at <u>www.avg.com</u>, on a page with a contact form addressing AVG technical / sales support teams (for details please see chapter <u>FAQ and Technical Support</u>)

5.2.2. Quarantined

The **Quarantine** tab displays a list of processes that were detected by **AVG Identity Protection** as malware, and therefore moved to the safe quarantine space where the respective program is disabled, blocked, and cannot restore its activity not even after computer restart. Being moved to quarantine, the program is deactivated and isolated but not actually deleted from your computer.

🖻 AVG Identity Pr	otection			
📕 AVG	Identity Prote	ection		
🥥 Sta	tus 🛛 🗸 Se	ttings 🤤 🖡	dvanced	9
Options	Quarantined	Allowed		
Threats that we system.	re determined to be	malware are place	ed in quarantine s	so that they can no longer harm your
Level	File	Date▼	User	Details
TE TE	STTROJAN32.EXE	16:03:23	Administrator	1 process terminated 2 files deleted 4 registry keys deleted Process Terminated: ➡ TESTROJAN32.EXE" ➡ TESTROJAN32.EXE ■ TESTROJAN32.EXE ➡ TESTROJAN32.EXE ■ TESTROJAN32.E
Submit	Delete Permanen	tly Restore		

For each of the quarantined items, **AVG Identity Protection** displays the following information: threat severity level, file name, date and time of the file appearance, name of the user that launched the respective process. Should you need any further information on the specific issue, highlight it in the list and the detailed information will be provided in the **Details** section on the right (*number of terminated processes, number of deleted processes, number of removed registry keys, name of the terminated process, exact location of the file*).

Control buttons

There are three control buttons accessible within the dialog:

• **Submit** - it might happen that **AVG Identity Protection** detects a new kind of malware on your computer. If so, it would be very useful to send information on this detection to AVG Labs. This way you help to increase the security level on computers all around the globe. The submitted information will not include any personally sensitive data. To submit a suspicious file to AVG Labs, please mark the check box next to the respective malware detected, and press the **Submit** button. You can even select and submit several processes at the same time.

- **Delete permanently** in case you want to get rid of a process detected as malware completely and have it removed from your computer, mark the check box next to the respective malware detected and press the **Delete permanently** button. You can delete several processes at the same time. Once you delete a process, you will not be able to restore it again!
- **Restore** if you think a process was quarantined by mistake and it is not actually malware, you can have it restored in its original location and launched again. To restore a process, mark the check box next to the respective process name, click the **Restore** button, and confirm your will when prompted. You can restore several processes at the same time. The respective process will be deleted from the quarantine, and launched again (*in some case or a computer restart might be required*).

5.2.3. Allowed

The **Allowed** tab offers a list of allowed processes, i.e. processes that you consider absolutely safe and would like them to be allowed to run on your computer, despite the fact **AVG Identity Protection** might detect these as possible malware or spyware.

If within the <u>Settings / Options</u> dialog you decided to keep the **Automatically quarantine detected threats** item unchecked, every time a possibly dangerous malware is detected, you will be asked whether it should be removed. If then you assign the suspicious application (*detected based on its behavior*) as safe, and you confirm it should be kept on your computer, the application will be added to so called **Allowed list**, and it will not be reported as potentially dangerous again:

	AVG Identity	Protection				_ 🗆 🗙
ſ	🚔 AVC	G Identity Pro	tection			
	ء 🥥	Status 🗹 S	iettings 🤤	Advanced		•
	Options	Quarantined	Allowed			
	Items that yo alert.	u decided were not h	armful are placed i	in the Allowed list s	o that they can run without causir	ig an
	Level	File▲	Date	User	Details	
		wmplayer.exe	15:12:34	Administrator	Path: wmplayer.exe	
	Submit	Add	Remove from List	Remove All	Refresh	

Any time **AVG Identity Protection** detects a suspicious activity, and you assign the specific application as safe, it will be automatically added to the list of allowed processes. The list provides the following information on each process:

- **Level** graphical identification of the respective process severity on a fourlevels scale:
 - ■□□□ safe
 - □□□□ low risk
 - ∘ ∎∎∎□ medium risk
 - ■■■■ critical risk
- File full name of the application
- Date date and time th application was assigned as safe
- User name of the user that has assigned the respective application as safe

If you need some more detailed information on a specific application, highlight the respective process in the list and see its name in the right hand section called **Details**. The name of the application is provided in the form of a hyperlink - click it to open the website with an overview of relevant search results relating to the name provided.

Control buttons

There are five control buttons accessible within the dialog:

- **Submit** it might happen that **AVG Identity Protection** detects a process that you have allowed to run. Submitting information on this false detection to AVG labs you can help to increase the global computer security. The submitted information will not include any personally sensitive data. To submit a file to AVG Labs, please mark the check box next to the respective malware detected, and press the **Submit** button. You can even select and submit several processes at the same time.
- **Add** if you want to add an item to the list of allowed processes manually, press this button to open the tree structure of your computer and look the respective application up. Then assign it, and the application will be added to the list of allowed processes.
- **Remove from list** press this button to delete a specific item from the list, typically in case you do not trust the application any more and would like to have it monitored by **AVG Identity Protection**.
- **Remove all** press this button to delete the entire list of allowed processes.
- **Refresh** press this button to update the list of allowed processes.

5.3. Advanced Tab

The **Advanced** tab is further divided into two sections that can be displayed by clicking the respective button in the header of the dialog:

- <u>Monitored</u>
- <u>Activity</u>

5.3.1. Monitored

AVG Identity Protection monitors all processes currently running in your computer. On the *Advanced/Monitored* tab you can find on overview of all these applications, so called list of monitored processes.

AVG Identity Protection Status Sette Monitored Activity All running processes are monitored Level PID File 0 0 4 system	ings Advanced	9				
Operation Status ✓ Sett Monitored Activity All running processes are monitored Level PID▲ File ■ ■ ■ 4 system	ings 📄 Advanced	0				
Monitored Activity All running processes are monitored Level PID File	on this list.					
All running processes are monitored Level PID Fi	on this list.					
Level PID▲ Fi						
Level PID▲ F						
□ ■□□□ 4 system	ile Date	e 📤 Details				
	N/A	Path: system				
264 avgidswatcher.ex	(e 30.7.2009	-The executable is allowed.				
☐ ■□□□ 420 avgidsui.exe	30.7.2009	Spawns other processes				
536 wscntfy.exe	30.7.2009	Executes from the filesystem

612 csrss.exe	30.7.2009)				
□ ■□□□ 636 winlogon.exe	30.7.2009)				
680 services.exe	30.7.2009					
[<]		>				
Stop Process Quarantine Allow Refresh						

The list provides the following information on each process:

- **Level** graphical identification of the respective process severity on a fourlevels scale:
 - o ∎□□□ safe
 - □□□□ low risk
 - ∘ ∎∎∎□ medium risk
 - ■■■■ critical risk
- **PID** numerical identification of the respective file

- File full name of the application's executable file
- **Date** date and time the file was established

Should you need any further information on the specific issue, highlight it in the list and the detailed information will be provided in the **Details** section on the right (*process name and path to its location; information on whether the process has been allowed or not; security level of the respective process; ...*).

Control buttons

The control buttons available within the *Advanced* tab are as follows:

- **Stop Process** use the button to stop a specific process in the list. The process might have been evaluated as safe. However, if you want to stop it immediately, mark the check box next to the process name and press the **Stop process** button. The process is stoped and can only be restored after your computer restart.
- **Quarantine** if you see a process in the list that you consider malicious even though **AVG Identity Protection** has evaluated it as safe, you can add it manually to the list of quarantines processes. The process will be deleted from its current location in the file system and stopped immediately. To move the process to quarantine, mark the check box next to the process name and press the **Quarantine** button.
- **Allow** if you want to allow a certain process to run on your computer, you can add it to the <u>list of allowed processes</u>. **AVG Identity Protection** will then consider the respective process safe and will not further watch its behavior. To add a process to the <u>list of allowed processes</u>, mark the check box next to the process name and press the **Allow** button.
- **Refresh** press this button to update the list of allowed processes.

5.3.2. Activity

The *Advanced/Activity* displays data on all important events that have appeared during the **AVG Identity Protection** run:

回 AVG Identity Prot	tection		_ = 🛛		
AVG lo	dentity Protection				
🥥 Statu	ıs 💉 Settings	Advanced	?		
Monitored	Activity				
Recent activity is i	recorded and displayed here.				
Date▼	Eve	nt	Details		
8:59:25	Protection disabled		Protection disabled on 5.8.2009 8:59:25		
3.8.2009	Protection enabled				
Remove All					

The list offers four main types of events:

- *Events regarding AVG Identity Protection run* all events referring to AVG **Identity Protection** work, e.g. protection enabling/disabling.
- **Events regarding malware detection** critical events: malware was detected in your computer!
- **Unknown events** potentially dangerous events, e.g. installation of some uncertified drivers.
- **Trusted events** absolutely safe and trusted events, e.g. certified software installation.

If you need more information on a specific event, highlight it in the list and go through the detailed data displayed in the **Details** section on the right.

Control buttons

There is only one single control button within this dialog:

• **Remove All** - press the button to delete the entire list of logged activities.

6. FAQ and Technical Support

Should you have any problems with your **AVG Identity Protection**, either business or technical, please refer to the *FAQ* (frequently asked questions) section of the AVG website at <u>www.avg.com</u>.

Technical support

If you do not succeed in finding help this way, contact the technical support department by email. Please use the contact form accessible in two ways:

- directly from the AVG Identity Protection application, Settings tab, the Get help online button
- from the AVG website at www.avg.com following the Support link

Sales support

With questions and issues that do not relate with technical aspects of **AVG Identity Protection** (*e.g. license numbers information, license upgrades and renewals, payment and registration, best AVG edition selection, AVG edition cross upgrade, price policy, discounts, complaints, partnership, ...) please contact our sales support team; again via the online contact form:*

- directly from the AVG Identity Protection application, Settings tab, the Get help online button
- from the AVG website at www.avg.com following the Support link
