1. Introduction

AVG is one of the world's most recognizable names in online threat protection, with millions of people around the world relying on us to keep them safe. Threats today go way beyond viruses and adapt quickly to new security measures in a desperate attempt to stay one step ahead of us. They're still trying. However, **AVG** is more than just an advanced technology provider, we are parents too and understand what it takes to protect your loved ones in this complex world.

AVG Family Safety offers a host of new innovative and patented safety features to go with our simple installation and easiest-to-use software on the market today. Our new browser based control panel and "in the cloud" managed services keep you automatically updated with the latest protection features.

As a cloud-based solution, **AVG Family Safety** also helps to take the load off your computers, which results in extremely fast response times not seen with traditional parental controls. **AVG Family Safety** offers accuracy and flexibility with an industry leading 56 categories that are automatically selected based on the age appropriate group.

1.1. Major features and advantages

- **Internet Web Filtering** – with continuous and automatic updates, **AVG Family Safety** uses a database of 62 million URLs representing hundreds of millions of webpages. Our servers are updated with an average of 20,000 URLs, programs, keywords and acronyms daily to provide comprehensive protection that keeps pace with the dynamic nature of the Internet. An industry leading 61 categories provide unprecedented ability to custom tailor settings to your needs. Text and email alerts notify parents when pages are blocked at home. Our reporting module allows easy monitoring of online activity for Web, search, Social Networking, PC applications and IM chats remotely.
- **SafeSearch Feature** – filters search inquiries for major search engines Bing, Google, Yahoo and YouTube. Includes image and video searches and works with all browsers.
- **SafeSurf Protection** – **AVG Family Safety** blocks access to dangerous sites containing Malware, Spam and Phishing applications. These applications can infect your computers and steal your family's personal and financial information.
- **Ease-of-Use** – **AVG Family Safety** installs in less than 10 minutes with out-of-the-box protection. Our new setup wizard makes it easy to set up age appropriate templates for all members of the family.
- **Graphical "Cloud" Interface** – maps users and devices with a flexible and intuitive user interface. Parents can easily customize all settings from anywhere using the new browser based control center. Easily change default options, add and delete custom URLs, programs, time schedules and much more...
- **Social Network Safety** – provides a clear window into your child's social networking world. **AVG Family Safety** has the most comprehensive parental monitoring for Facebook, Twitter, MySpace, Bebo and 75 other sites including web based chat, Instant Messaging and other types of social sites. Text and email alerts give parents a warning on potential trouble, then allows the parent to automatically view the child social accounts without needing to know usernames and passwords.

- **The Whole Home Filtering** – exclusive Whole Home option for routers filters any device that enters your home, without the need to install software. Devices like Wii's, smartphones, laptops, Apple and others with browsers are all filtered for search and web sites.
- **Online Video Filtering** – **AVG Family Safety** offers the most wide-ranging and accurate filtering of online TV shows and movies based on industry MPAA ratings. Includes coverage for most major online media sites as well as iTunes music filtering. Also restricts iTunes explicit music.
- **Web Game Filtering** – online gaming sites are automatically filtered for mature content by age group using industry standard ESRB ratings.
- **Block, Warn, or Monitor Options** – this option allows the administrator to select how to manage and control access to blocked sites. Choose from blocking entirely, posting a warning but allowing access, or simply recording surf history without block pages, **AVG Family Safety** also includes an option for in-page password override.
- **Tamper-Resistance** – **AVG Family Safety** plugs secret workarounds used by tech savvy teens. For example, our exclusive "3 strikes and out" feature that locks the PC if your child tried multiple attempts to visit prohibited sites.
- **Program/Application Blocking** – **AVG Family Safety** lets you easily see and control which programs your family is using. Includes popular email programs, peer-to-peer applications, VPN clients, instant messaging, PC games, proxies and file-sharing software.
- **Time Management** – parents can easily set time schedules for individual children or across the entire group with our graphical 24 x 7 calendar.
- **Compatibility** – **AVG Family Safety** works from anywhere in the world with any existing Internet connection (dial-up, DSL, cable, satellite).
- **Convenience** – automated-server-side updates along with the Web-based control center makes managing the **AVG Family Safety** a snap.
- **Accuracy** – our multiple threat database libraries are developed with patent-pending technology and also include human review to reduce false positives.
- **Advanced Reporting** – **AVG Family Safety** offers powerful graphical reporting that is tamper proof and easy to access from any browser, even when on the road. Also, suspicious activities on web, search and social networking sites are flagged by parental alerts using text messages or email.
- **Mobile Device Protection** – FREE web filtering protection for the Apple iPad / iPhone / iTouch devices. Wherever your child travels, the filter app is automatically updated with extensive site lists on cloud servers. When used with a paid account, can be synchronized and managed from the **AVG Family Safety** Web-based control center.

2. Getting started

2.1. Control Panel

The Internet Protection Control Panel is where you go to customize and configure all your **AVG Family Safety** services. The main page of the Control Panel is the Activity Monitoring Summary Report. The diagram below displays the primary areas you will use to customize your Internet Protection Services.

How do I open the account login page?

1. Double click the **AVG Family Safety** desktop  or system tray

2. Enter your login information to access the control panel.
3. Click on the My Account link to open the Control Panel.

The screenshot shows the AVG Family Safety Control Panel interface. The top navigation bar (1) includes 'My Account', 'Preferences', 'Help', and 'Logout'. Below it are 'Activity Monitoring' and 'Parental Controls' tabs (2). The 'Parental Controls' section (3) shows a toggle switch (4) set to 'ON'. Below this are tabs for 'Categories', 'Media', 'Block Sites', 'Allow Sites', 'Options', 'Access Times', 'Alerts', and 'Programs' (5). The 'Categories' tab is active, showing 'Age Templates and Categories for Group' (6) with a help button (?). The 'Default Age Templates' section includes radio buttons for 'Child (0-8)', 'Youth (9-12)', 'Teen (13-17)', and 'Adult (18+)'. A list of categories (7) is shown with checkboxes, including Abortion, Advertising, Alcohol, Art and Museums, Art Nudes, Automotive, Blogs, Business, Chat, Criminal Skills and Hacking, Cult and Occult, Drugs, Dynamic, Educational, and Entertainment. At the bottom are 'Clear All', 'Select All', 'Block all non-categorized sites', 'Apply to all profiles', and 'Save' buttons (8).

1. Navigation Panel
2. [Services tabs](#)
3. [Profile Management](#)
4. Feature on/off switch
5. Feature tabs
6. Feature help button
7. Configuration Window
8. Action buttons

2.2. Services tabs

These tabs, located at the top of the Control Panel, is where to access and manage the various features for **Activity Monitoring** and **Parental Control** services.

- select the **Activity Monitoring tab** to view the activity reports and configure the following Activity Monitoring features: [Summary](#), [All Sites](#), [Social Sites](#), [Searches](#), [Instant Messages](#), [Programs](#), and [Alert Log](#).
- select the **Parental Controls tab** to customize and manage the following Parental Control features for each profile: [Categories](#), [Media](#), [Block Sites](#), [Allow Sites](#), [Options](#), [Access Times](#), [Alerts](#) and [Programs](#).

2.3. Profile Management

The Profile Management section is where you create and manage the profiles for your internet protection services. This is also where you setup and modify your Whole Home Filtering (WHF) settings. The user setting that is highlighted in grey is the profile that will be affected by any saved changes.

To prevent tampering and for added computer security, **AVG** recommends setting up [limited user accounts in Windows](#) and assigning them to individual profiles.

How do I add a new profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the **Add profile** link, this will open the "create new settings profile" panel.
3. Enter a name for the new profile (**required**).
4. Enter a brief description for the new profile (optional).
5. Select an age group from the **age template initial settings** drop down menu.
6. Select the icon you would like to use for the new profile. The icons can be displayed by groups, male, female, adult, teens, youth, and child. *For example, you can choose to only view male - teen icons.*
7. Click the **Save** button to save your new profile.

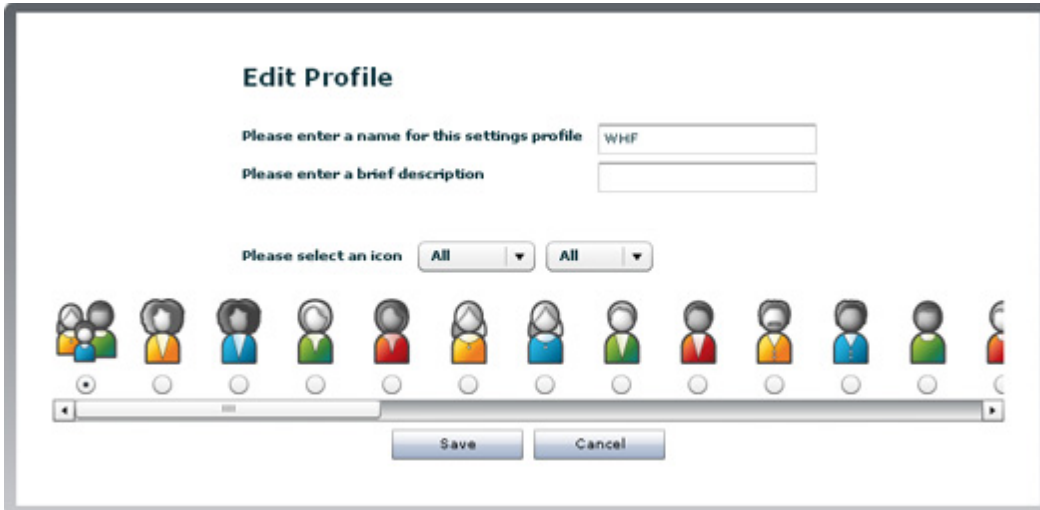

How do I remove a profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the profile that you would like to remove. Please keep in mind that the administrative profile cannot be removed. However, it can be renamed by clicking on the icon, located in the top left corner of the selected profile.
3. Select the red **X** in the upper right corner of the profile's icon.
4. Click the **Yes** button to confirm the deletion of the selected profile.

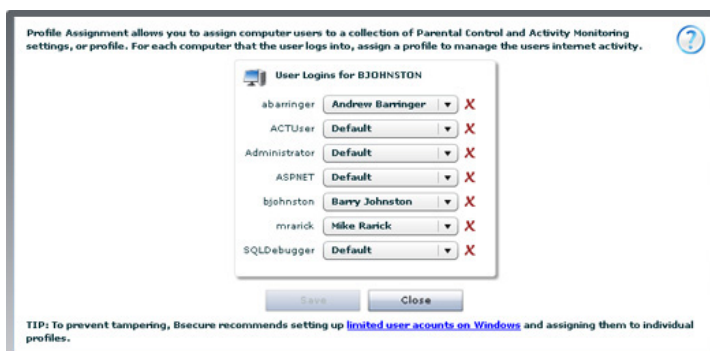

How do I edit a profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the profile that you would like to edit.
3. Click the  icon in the upper left corner of the selected profile.
4. Enter a new name and/or brief description for the profile.
5. Click the **Save** button to preserve your changes.

How do I assign a profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the **Assign profile** link.
3. Now you can see all the manageable devices and their logins. Select the device from the list, then click the drop down arrow next to the corresponding system / device login to select & assign one of the established profiles (available profiles will be visible in the profile management section).

4. Click the **Save** button to preserve your changes.

2.4. Feature Tabs

These tabs are located in the middle of the Control Panel. This is where you manage the "features" that are available for each Service.

- The **Activity Monitoring** tab is where to go for the reporting feature of AVG Family Safety. The reporting module allows for easy monitoring of online activity for Web, application and

IM chats remotely.

- [Summary](#) - here you can review reports of Web access history.
 - [All Sites](#) - here you can review Web access history for all sites visited.
 - [Social Sites](#) - here you can review Web access history for social sites visited.
 - [Searches](#) - here you can review Web search history.
 - [Instant Messages](#) - here you can review Instant Message activity.
 - [Programs](#) - here you can review program access history.
 - [Alert Log](#) - here you can review alerts history.
- The [Parental Controls](#) tab is where to go to customize and manage your filter settings.
 - [Categories](#) - here you can select the list of blocked categories. You may choose a template setting based on age group or customize a list to suit your personal needs.
 - [Media](#) - here you can manage and restrict a profile's access to media content on the internet.
 - [Block Sites](#) - here you can create customized lists that enable you to block specific Web sites by URL and helps control content filtering more specifically. Also, where to block all uncategorized Web sites (URL's).
 - [Allow Sites](#) - here you can create customized lists that enable you to allow specific Web sites by URL and helps control content filtering more specifically. This lets you access a Web site without having to unblock the category it falls under. Also a place to create a "white list."
 - [Options](#) - here you can manage password override, safety lock, block/warn monitor, file extension filter etc.
 - [Access Times](#) - here you can control Internet access for the entire network or individual computer profiles. Web browsing can be controlled by time of day and each day of the week when this feature is enabled.
 - [Alerts](#) - here you can manage alert delivery.
 - [Programs](#) - here you can manage access to select programs on your PC.

2.5. Configuration Window

This is where you can manage your feature settings. These settings can be customized for each profile.

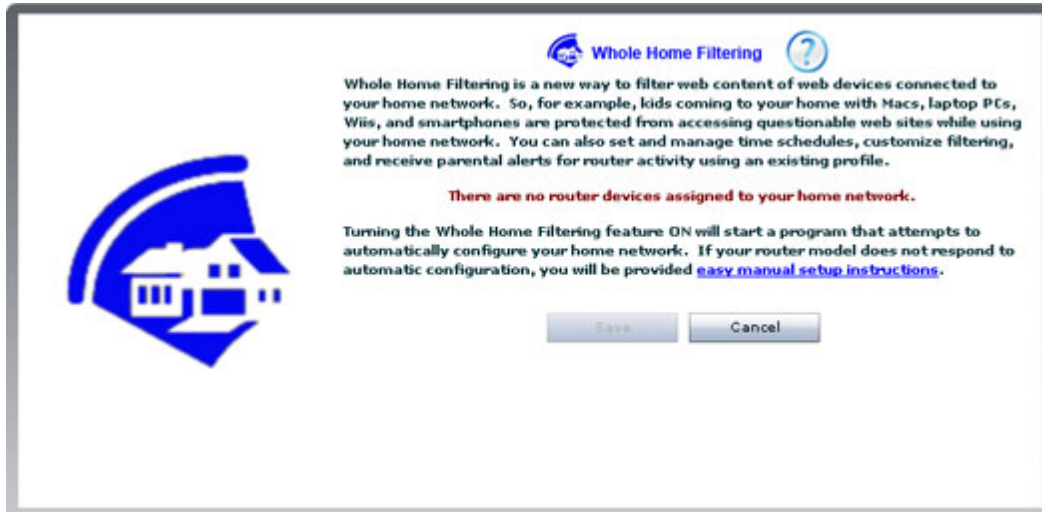

The screenshot shows the 'Age Templates and Categories for Group' configuration window. It includes a 'Group' icon, a description, and a 'Default Age Templates' section with radio buttons for 'Child (0-8)', 'Youth (9-12)', 'Teen (13-17)', 'Adult (18+)', and 'Custom'. Below this is a list of categories with green checkmarks, including Abortion, Advertising, Alcohol, Art and Museums, Art Nudes, Automotive, Blogs, Business, Chat, Criminal Skills and Hacking, Cult and Occult, Drugs, Dynamic, Educational, and Entertainment. At the bottom, there are buttons for 'Clear All', 'Select All', checkboxes for 'Block all non-categorized sites' and 'Apply to all profiles', and a 'Save' button.

2.6. Whole Home Filtering

AVG Family Safety Whole Home Filtering (WHF) service provides content filtering of any network device behind a home network router that has been properly configured to interface with the **AVG Family Safety** filtering services. Simply assign a profile to your home network router, and you are ready to manage the filter services for your whole home network. WHF includes: filtering by [Category](#), custom [Block Sites](#), custom [Allow Sites](#), [Access Times](#) scheduling, reporting of [All Sites](#) visited, and [Alerts](#).

It is recommended that you create an **exclusive WHF profile** for managing your network's filter settings. ***If you change routers, you will need to reestablish your WHF settings.***

Click [here](#) if you wish to learn how to manually setup your router for WHF services.

How do I turn on Whole Home Filtering (WHF) and assign a profile to it?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the **Whole Home Filtering** link; this will open the "Whole Home Filtering" panel.
3. Click the red OFF indicator OFF to display the green ON ON. The WHF feature is now enabled.
4. Choose the profile setting that you would like to assign to the WHF network. This can be any of the already established profiles or you can create a "new" profile specifically for your WHF. Use the add profile link to create a new profile.
5. Enter your username and password for your home network's router.
6. Click **Save** to preserve your settings.

How do I setup WHF text (SMS) alerts?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you assigned on the WHF setup panel. If you have not already done so, you may want to setup an exclusive profile for WHF.
4. Verify that **Parent Alerts** is turned on.

 **Set up Parent Alerts for WHF.** ON

Parents may receive text (SMS) and email alerts when blocked sites are accessed. When Social Network Monitoring is active, alerts will also be sent when matching content is posted. *Bsecure does not charge for messages. Check with your mobile carrier for possible fees.

5. Enter a mobile phone number in the text box provided under the mobile number section. Be sure to include the area code.
6. Select your mobile carrier from the list provided.
7. Click the **Add** button to add the number to your mobile number list.

To add an SMS number, type it in here, then click **Add**

7-11 Speakout (US) ▼

8. Repeat steps 5 thru 7 for each mobile number that you would like to setup.
9. Select the **Send test message** box in order to verify your SMS alerts setup. Keep in mind that SMS alerts are sent out in one minute intervals. Please allow at least one minute between each test.
10. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears. All changes made will be applied to the highlighted profile only.

How do I setup WHF email alerts?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parent Alerts** is turned on.
5. Enter the email address in the text box provided under the email address section.
6. Click the **Add** button to add the number to your mobile number list.

To add an e-mail address, type it in here, then click **Add**

7. Repeat steps 5 and 6 for each mobile number that you would like to setup.

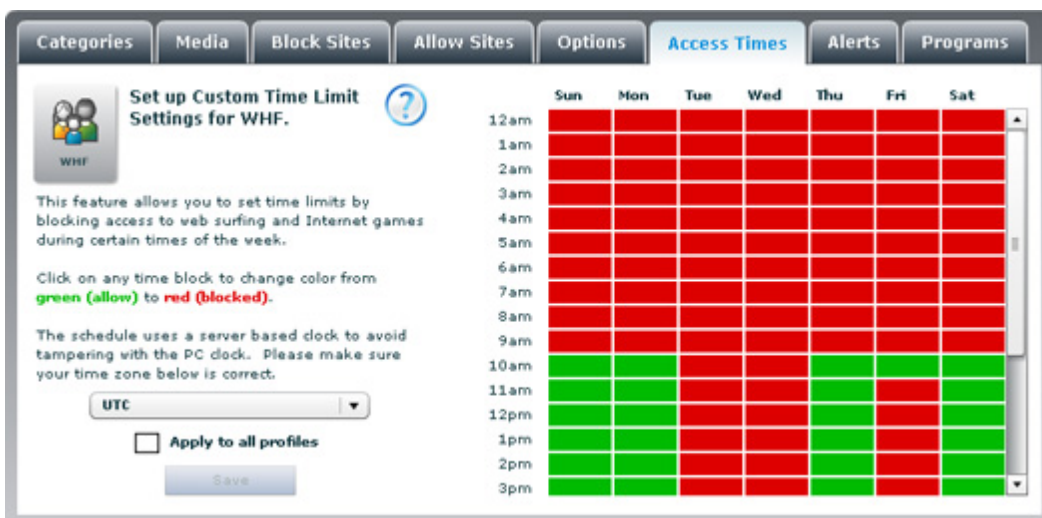

8. Select the **Send test message** box in order to verify your email alerts setup.
9. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears. All changes made will be applied to the highlighted profile only.

How do I restrict Internet access times?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Access Times** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on **ON** for the selected profile.
5. Select your time zone from the drop down list:

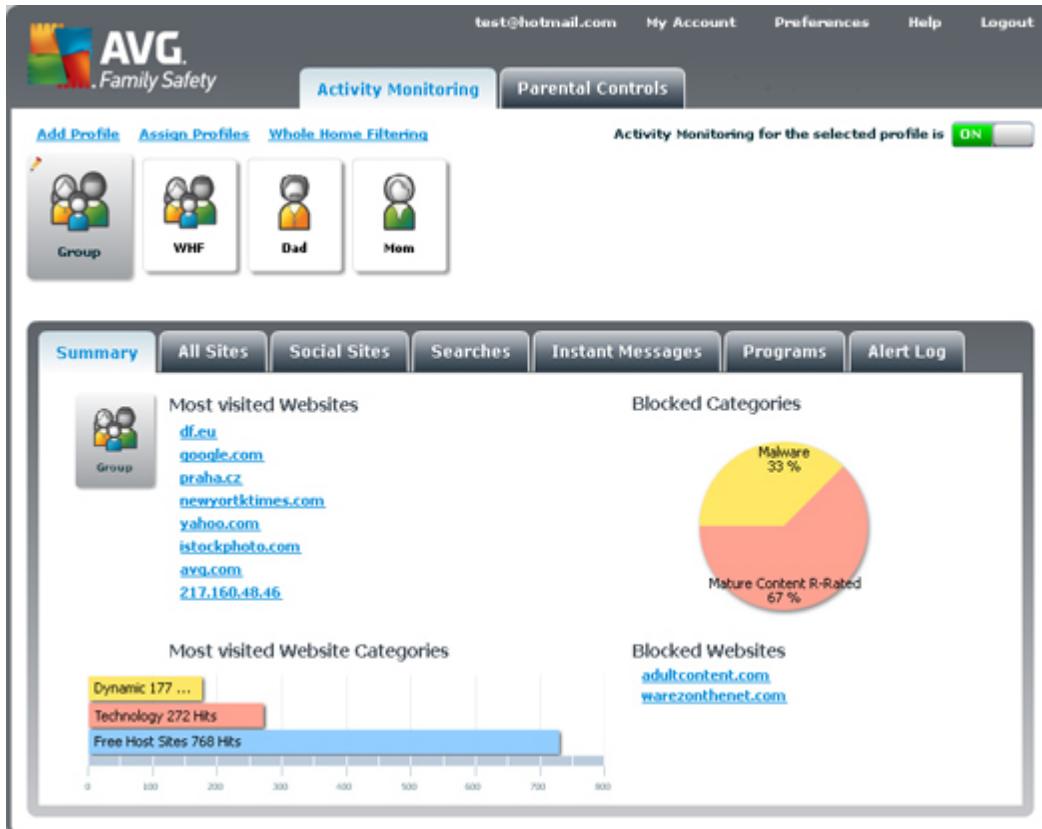

6. Click the time block to change the color. **Green** blocks indicate times that are **allowed** and **red** blocks indicate times that are **blocked**. To select multiple time blocks, click in the initial time block and drag your mouse across the desired blocks.

7. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears.

3. Activity monitoring

After you open **AVG Family Safety** interface, this tab and its contents will be the first thing you'll see.

The **Activity Monitoring** service creates historical records, which cannot be altered or erased, of the websites accessed. This information is maintained in a calendar format for up to two weeks. Archived reports contain the profile, date, website visited (with active link), webpage visited (with active link), website category, search terms and number of hits. This information can be viewed by the account administrator at any time by logging in to the **AVG Family Safety** Online control center.

Please note that only two weeks of report data will be stored on the **AVG Family Safety** server.

Before you can begin to use the **Activity Monitoring** feature, make sure you have the feature turned on.

How do I enable Activity Monitoring?

1. Double click the **AVG Family Safety** desktop  or system tray

2. Enter your login information to access the control panel.

3. Select the **Activity Monitoring** tab from the "Services tabs".
4. Select the profile that you would like to view.
5. Click the red OFF indicator to display the green ON . The **Activity Monitoring** feature is now enabled for the selected profile.

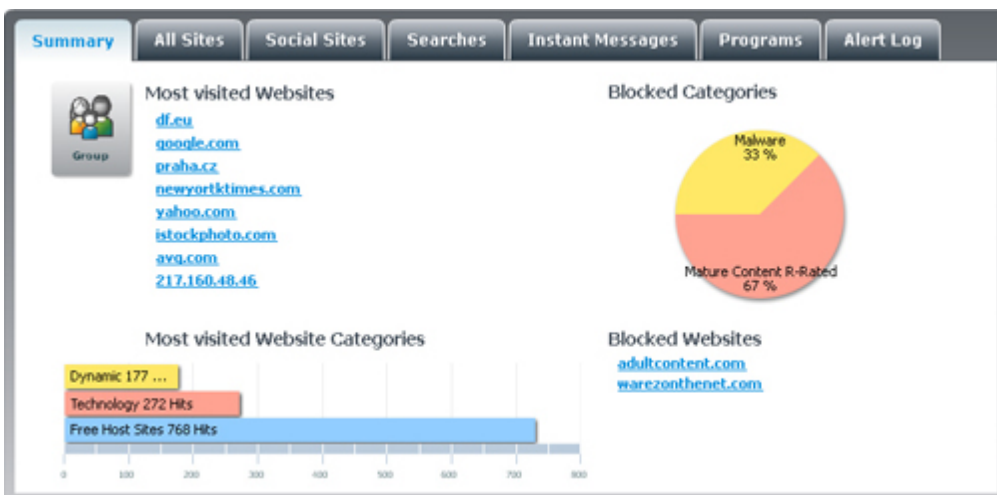

How do I disable Activity Monitoring?

1. Double click the **AVG Family Safety** desktop  or system tray  icon.
2. Enter your login information to access the control panel.
3. Select the **Activity Monitoring** tab from the "Services tabs".
4. Select the profile that you would like to view.
5. Click the green ON indicator to display the red OFF . The **Activity Monitoring** feature is now disabled for the selected profile.

The **Activity Monitoring** tab contains several topical sub-tabs. Simply left-click them to view their contents.

3.1. Summary

This sub-tab displays statistics and links for the most visited websites, most visited website categories, blocked categories, and blocked websites for the selected profile.

3.2. All Sites

This sub-tab allows you to review Web access history for all sites visited by the selected profile.

Date/Time	Site	Page	Reason / Category	Hits
-----------	------	------	-------------------	------

There are two active links in the reporting section:

- **Site** - links to the domain or main website address.
- **Page** - links to the actual page that was visited on the website.

The report section also provides info about the **Date / Time** the site was visited, the **Reason / Category** the site was block and the number of **Hits** or visits to the site.

Block reasons that may be listed under **Reason / Category** are:

- **CategoryBlock** - the listed category is blocked for the selected profile. Use the Categories tab if adjustments are desired.
- **ScheduleBlock** - the time schedule for the selected profile prevented internet access. If needed, use the Access Times tab to make adjustments.
- **UserDefinedBlockList** - the blocked site is listed on the profile's Block Sites list. Use the Block Sites tab to make adjustments.
- **UncategorizedBlock** - the blocked site is uncategorized and the "Block all non-categorized sites" box is checked. Use the [Categories tab](#) to make adjustments. The check box is located on the bottom of the Categories screen.
- **WhiteListOnlyBlock** - the blocked site is not listed on the Allow Sites list and the White List or "Only allow sites listed in the Allow list" box is checked. The selected profile can only visit sites listed on the Allow Sites list if the White list box is checked. Use the Allow Sites tab to make adjustments (the check box is located at the bottom of this screen).
- **iCatBlock** - the blocked site is uncategorized and was iCat filter evaluated it as offensive.

Use the Options tab to manage the iCat setting for the selected profile.

- **SafetyLockBlock** - the site was blocked because of the Safety Lock setting for the selected profile. Based on the setting, Internet access is disabled once a certain number of sites have been blocked. Use the Options tab to adjust the profile's Safety Lock setting.
- **PasswordOverrideAllow** - the blocked site was allowed because the Password Override option is turned on and either the administrative or secondary password was provided. Use the Options tab to make adjustments to the Password Override setting.
- **UserDefinedAllowList** - the site is listed on the profile's Allow Sites list. Use the Allow Sites tab to make adjustments.

If there is no **Category / Reason** listed, the site was not blocked. If you wish to view only blocked sites, check the **Show Questionable Activity Only** box at the bottom left corner of the screen.

How do I change the time frame of the displayed data?

1. Double click the **AVG Family Safety** desktop  or system tray

2. Enter your login information to access the control panel.
3. Select **Activity Monitoring** from the "Services tabs".
4. Select the profile that you would like to view.
5. Make sure the **Activity Monitoring** feature is turned ON .
6. Select the **All Sites** sub-tab.
7. Select the desired **From** date and the desired **To** date using the calendar button .
8. Click the  button to see data for the selected range.

3.3. Social Sites

This powerful reporting feature is not only displays social site access history, but it also is where parents can gain access to the Group's accounts. This feature is off by default.

There are two active links in the reporting section:

- **Site** - links to the domain or main website address.
- **User Name** - automatic account login.

To remove the social site from the list, simply click the red crosslet in the **Remove** column.

Important notice: The social networking feature collects confidential account data and is for enabling parents to monitor their child's safety. This feature should only be turned on for child profiles and for home computer use.

How do I turn social site filtering?

1. Double click the **AVG Family Safety** desktop  or system tray  icon.
 
2. Enter your login information to access the control panel.
3. Select **Activity Monitoring** from the "Services tabs".
4. Select the **Social Sites** sub-tab.
5. Select the profile that you would like to manage.
6. The default setting for this feature is OFF. Click the red OFF indicator  to display the green ON . The **Social Sites** reporting feature is now enabled for the selected

profile.

How do I log into a profile's social site account?

1. Double click the **AVG Family Safety** desktop  or system tray

2. Enter your login information to access the control panel.
3. Select **Activity Monitoring** from the "Services tabs".
4. Select the **Social Sites** sub-tab.
5. Select the profile that you would like to manage.
6. Verify that the feature is ON .
7. Click the corresponding link under **User Name**, for the site that you would like to access.

3.4. Searches

This sub-tab is where you can review the search detail for Web access history. This feature may be useful in providing an early warning for potentially harmful topics that are being searched by the selected profile.

Date/Time	Site	Page	Search Terms	Hits
-----------	------	------	--------------	------

There are two active links in the reporting section:

- **Site** - links to the domain or main website address.
- **Page** - links to the actual page that was visited on the website.

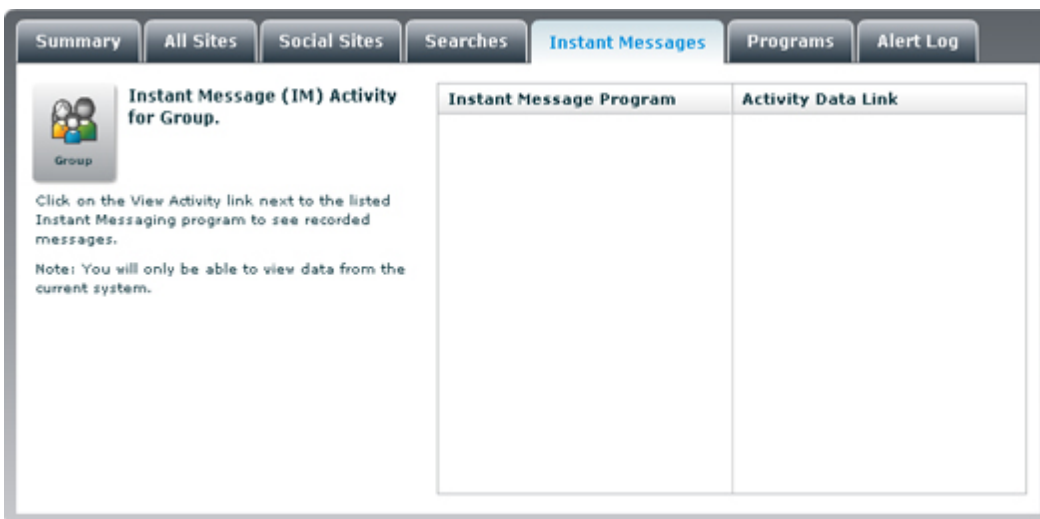

How do I change the time frame of the displayed data?

1. Double click the **AVG Family Safety** desktop  or system tray  icon.
2. Enter your login information to access the control panel.
3. Select **Activity Monitoring** from the "Services tabs".
4. Select the profile that you would like to view.
5. Make sure the **Activity Monitoring** feature is turned ON .
6. Select the **Searches** sub-tab.
7. Select the desired **From** date and the desired **To** date using the calendar button .
8. Click the  button to see data for the selected range.

3.5. Instant Messages

Instant messages are a form of real-time direct text-based communication between two or more people using an instant messaging application such as MSN messenger or Yahoo IM. The text is sent using devices that are connected over a network such as the Internet.

The Instant Message activity report provides the recorded messages for various Instant Messaging programs.

For every wide-spread instant messaging application, there is the **View Activity** link available. Click it link to see the saved conversation.

3.6. Programs

In this sub-tab you can view the program access history for selected profile.

Program	Description	Action	Start	Stop	Duration

How do I change the time frame of the displayed data?

1. Double click the **AVG Family Safety** desktop  or system tray  icon.
 
2. Enter your login information to access the control panel.
3. Select **Activity Monitoring** from the "Services tabs".
4. Select the profile that you would like to view.
5. Make sure the **Activity Monitoring** feature is turned ON .
6. Select the **Programs** sub-tab.
7. Select the desired **From** date and the desired **To** date using the calendar button .
8. Click the  button to see data for the selected range.

3.7. Alert Log

The Alert Log sub-tab is where you can view the history of all alerts sent for the selected profile:

Date/Time	Site	Category
-----------	------	----------

Date/Time	Site	Keyword	Used in Context
-----------	------	---------	-----------------

An alert will be sent when a profile user attempts to access a Web site categorized as pornography and when a keyword or phrase is used on most social sites.

- **Pornographic websites** - when pornographic site access is attempted, an alert will be sent and the alert log will record the following (Parental Controls and Alerts must be turned on and at least one email address or mobile number must be provided):
 - *date and time the attempt was made*
 - *a link to the pornographic site*
 - *the site category*
- **Keywords Filtering** - when any one of the many keywords or phrases is used on most Web sites categorized as social sites, and alert will be sent and the alert log will record the following information (Parental Controls and Alerts must be turned on and at least one email address or mobile number must be provided):
 - *date and time the keyword or phrase was used*
 - *the social site used on*
 - *the keyword or phrase used*
 - *the context in which it was used*

Please note that the email address provided during registration is the default for all alerts.

4. Parental controls

This is a service that protects your home from the dangers of the Internet while giving you flexible control over Web sites and Internet application usage. The flexibility allows for a custom level of filtering sites and protects against dangerous sites infected with spyware or malware.

The ability to create customized lists enables you to block or allow specific Web sites by URL and create White Lists (list of specified "only allow" Web sites) if desired to control content filtering more specifically.

Please note that while the **AVG Family Safety** filter is continually being updated, no filter can guarantee 100% effectiveness. In addition, there are a number of websites that are uncategorized, or have overlapping categories.

The Parental Controls tab contains the following sub-tabs (with their unique filter settings):

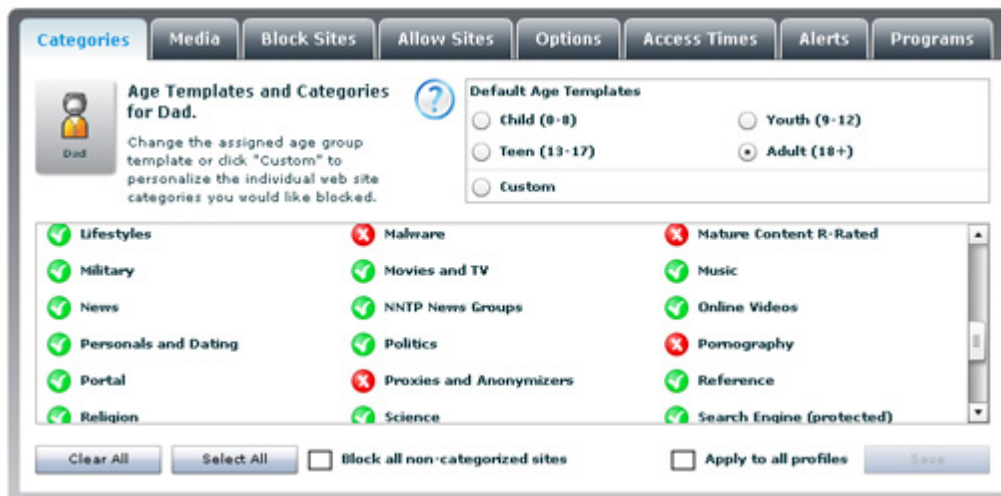

- **Categories** - use to assign age templates or manage the website categories that you would like blocked for your profiles.
- **Media** - use to manage the accessibility of online media content using industry standard ratings.
- **Block Sites** - use to create and manage a custom list of websites that you would like to block for your profiles.

- [Allow Sites](#) - use to create and manage a custom list of websites that you would like to allow settings for your profiles.
- [Options](#) - use to manage key filter settings such as, password override, safety lock, block/warn monitor, and image filter for your profiles.
- [Access Times](#) - use to establish and manage Internet access time limit settings for profiles.
- [Alerts](#) - use to establish and manage alerts to receive notification via email or text messages when webpages are blocked.
- [Programs](#) - use to manage access to select programs on your PC.

4.1. Categories

Most websites are classified in one or more groups or categories. The **categories** identify the topics or interests that are the main focus of the website. Our filter gives you the ability to block all URLs (websites) that have been identified as being in a particular **category**.

This sub-tab tab is where you go to manage the website categories. You can select from a list of blocked categories for more explicit content filtering or you may choose a template setting based on age group.

The categories marked as  are **to be blocked**, those marked as  are **to be allowed**.

How do I manage the categories?

1. Select **Parental Controls** from the "Services tabs".
2. You should be on the **Categories tab**.
3. Select the profile that you would like to manage.

4. Verify that **Parental Controls** is turned on for the selected profile.
5. Select custom or one of the preset age group templates (The **Adult Filtering Age Group** is selected by default):
 - **Custom** - select this option to choose from all categories.
 - **Child (0-8)*** - select this group to **only allow**:
 - Arts and Museums
 - Automotive
 - Business
 - Dynamic
 - Educational
 - Finance and Investing
 - Government
 - Hobby
 - Kids
 - Music
 - Reference
 - Religion
 - Science
 - Search Engine (protected)
 - Sports
 - Technology
 - Travel
 - **Youth (9-12)*** - select this group to **only allow**:
 - Arts & Museums
 - Automotive
 - Business
 - Dynamic
 - Educational
 - Entertainment
 - Finance & Investing
 - Games
 - Glamour
 - Government
 - Health & Fitness
 - Hobby
 - Kids
 - Music
 - News
 - Reference
 - Religion
 - Science
 - Search Engine (protected)
 - Shopping
 - Sports
 - Technology
 - Travel

- Webmail
- **Teen (13-17)*** - select this group to **only block**:
 - Abortion
 - Alcohol
 - Art Nudes
 - Chat
 - Criminal Hacking
 - Cult & Occult
 - Drugs
 - File Sharing
 - Gambling
 - Hate
 - Lifestyles
 - Malware
 - Mature Content R-Rated
 - Movies and TV
 - NNTP News Groups
 - Personals & Dating
 - Pornography
 - Proxies & Anonymizers
 - Search Engine (unprotected)
 - Self-Harm
 - Suicide
 - Tobacco
 - Violence & Gore
- **Adult (18+)*** - select this group to **only block**:
 - Malware
 - Mature Content R-Rated
 - Pornography

6. **Proxies & Anonymizer** - select the categories to **block** or **allow** access.

7. To block all unknown and non-categorized sites, **select the check box** located below the categories list. A check mark indicates that this feature is turned on.

Block all non-categorized sites

8. Click the button to **allow all** categories.

9. Click the button to **block all** categories.

10. Select the "Apply to all profiles" box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

Please note that any modification to the categories selected in the predefined Age groups automatically changes your template selection to "Custom".

The following list contains all available categories:

- **Abortion** - sites which provide information or arguments related to abortion, describe abortion procedures, or offer advice, help, or testimonials related to abortion.
- **Advertising** - sites dealing with pop ups, banner ads, pay per click advertising, etc...
- **Alcohol** - web sites which sell or contain information relating to the recreational use of alcohol. This includes sites that sell alcohol, sites of alcohol manufacturers, sites containing tips and information on mixing your own drinks, and any other sites dedicated to and promoting the use of alcohol.
- **Art and Museums** - sites which include art galleries, artists, and museums. All types of visual arts such as performing arts, theater, painting, drawing, sculpture, and photography are included.
- **Art Nudes** - sites which contain the non-pornographic, tasteful, and artful display of the naked body. The main purpose of these sites is NOT sexual arousal.
- **Automotive** - sites which market, discuss, promote, or offer information on all forms of transportation. This would include vehicle maintenance Web sites and car rental sites.
- **Blogs** - sites which feature commentary and articles written a long or journal format, generally called blogs. These blogs can be from personal or non-commercial sources.
- **Business** - sites which are businesses defined as organizations that provide goods or services for profit.
- **Chat** - sites which allow chatting without a moderator to monitor for questionable content. In order to avoid this category, the site must require the moderator to be present the entire time the chat is open.
- **Criminal Skills and Hacking** - sites which promote illegal or criminal activity such as credit card theft, illegal surveillance, murder, unlawful or questionable tools to gain access to software or hardware, communications equipment, or passwords. This category includes sites that discuss password generation, compiled binaries, hacking tools, cheating, pirated materials, or software piracy. Websites which contain material of a questionable legal or ethical nature. This category includes sites that promote or distribute products, information, or devices whose use may be deemed unethical or illegal.
- **Cult and Occult** - sites which promote non-traditional or unconventional religious activities, and a zealous devotion to a person, idea, object, movement, or work.
- **Drugs** - sites which promote the sale or use of illegal drugs and narcotics, including sites offering paraphernalia for use with narcotics, legal supplements for their narcotic effect, or instruction manuals for the production of various narcotics.
- **Dynamic** - sites that contain content which is constantly changing and is of a questionable nature, such as group hosting, auction, and stock photography. Known harmful sections will be assigned an appropriate category.
- **Educational** - sites for the purpose of education, universities, schools, learning centers, teaching

institutions, online classes, workshops, technical institutes, and trade schools. Would also include sites which contain information on teaching aids such as lesson planning guides, teacher supplies, educational games, career development education, and .edu sites.

- **Entertainment** - sites which include any general entertainment sites such as theaters, concerts, sporting events, restaurants and clubs, clipart and animated .gifs, amusement parks, and sites offering cell-phone ring tones. Also websites which discuss and promote film and television. This category also includes official movie and television sites, and official film and television celebrity sites. Fan websites for film, television, or celebrities are also included.
- **File Sharing** - sites which offer peer-to-peer file sharing software and transfers.
- **Finance and Investing** - sites which are related to the financial trade, and include stock and exchange trading sites, financial news sites, and online banking services.
- **Forums and Message Boards** - sites which offer interaction among Internet users with similar interests. They may include message boards, bulletin boards, forums, or any other site that offers its visitors the ability to discuss topics with one another via the Internet. This category applies to downloadable and customizable message board software.
- **Free Host Sites** - sites which provide individuals or organizations with online systems for storing information, images, video, or any content accessible via the web such as Free and paid hosting, Dedicated or managed hosting, Virtual private server hosting, Online backup or file storage.
- **Freeware and Shareware** - sites that offer the download of software online without requiring purchase.
- **Gambling** - sites which encourage gambling, and may include betting, bookmaker odds, lottery, bingo, horse or dog track, or online casinos.
- **Games** - sites that offer or promote games. These may include discussion, review, or online gaming sites. This category also applies to sites that offer or are dedicated to promoting board games and electronic games. Sweepstakes and giveaway sites would also fall under this category. This category is not used for gaming sites depicting violence or sex.
- **Glamour** - sites which are dedicated to the promotion of fashion and modeling, including discussion boards, portfolio sites and modeling agencies, contests and fashion shows, and any non-commercial website dedicated to fashion.
- **Government** - sites which include sites with .gov domain, and any other sites for governmental agencies at the national, state, local, or international level. Websites which promote community involvement, and may include City or local government sites, the Chamber of Commerce, or sites that detail community events or places to see.
- **Hate** - sites which contain material related to discrimination based on race, religion, gender, or nationality. This category includes sites that approve of racial superiority, degradation, violence, or the destruction of human life motivated by such discrimination.
- **Health and Fitness** - sites which contain information on the practice of medicine, and may include medical practice, hospital, health insurance provider, nursing home, and assisted living sites. This category also includes websites that offer or provide information on prescription medicines and

over-the-counter treatments, as well as preventative health care. Also sites which offer information on alternative medicines and natural healing. These sites may include information on homeopathic medicine, acupuncture and acupressure, chakra alignment, or Feng Shui.

- **Hobby** - sites which offer information and support to hobbies, clubs and social organizations. This category includes sites pertaining to horticulture, gardening and yard maintenance, decorating and crafting, and collecting.
- **Inactive Domains** - sites where currently unused domain names are redirected to. Often questionable advertising is resident on these pages.
- **Job Search** - sites which are geared toward job seekers, and include sites such as job bulletin boards, classified ad sites, services that list or compile resumes and cover letters, and headhunting firms.
- **Kids** - sites which provide a safe and interesting Internet experience for children under 12 years old. Includes activities, crafts, and interactive learning.
- **Lifestyles** - sites which contain material relative to an individual's personal choices. This category includes sites advocating sexual lifestyles outside of marriage.
- **Malware** - sites which contain malware. This includes viruses, spyware, trojans, and adware.
- **Mature Content R-Rated** - sites which offer material that is adult in nature without being explicitly pornographic. These sites may contain profanity, information of a mature nature, photographs of women in swimsuits or lingerie, or revealing and sensual photography.
- **Military** - sites which include all .mil top-level domains, and any other government-sponsored sites on the various branches of the military. Also websites which promote or celebrate the armed services, including individual or regiment sites, and veteran or troop support sites.
- **Movies and TV** - sites which include online media, movie and television sites, and major network television sites.
- **Music** - sites which discuss or promote music, musicians, or the methods in which they are distributed. This category includes official and fan sites for musical artists.
- **News** - sites which distribute news, current events, weather, traffic and headlines. This would also include news commentary, and news blogs.
- **NNTP (Network News Transfer Protocol) Groups** - this is the protocol used by computer clients and servers for managing the notes posted on Usenet newsgroups. NNTP servers manage the global network of collected Usenet newsgroups and include the server at your Internet access provider. An NNTP client is included as part of a Netscape, Internet Explorer, Opera, or other web browser or you may use a separate client program called a newsreader.
- **Online Videos** - sites which host streaming media like television, movies, video, radio, or other media.
- **Personals and Dating** - sites which facilitate the search for and development of relationships with other people. The purposes of these sites are to bring people together for friendships, dating, or

marriage. This category includes sites offering personal ads, dating services, and information.

- **Politics** - sites which offer opinions dealing with political issues. These Web sites may include such topics as party platforms, political reform, candidate advocacy, lobbying organizations, campaign sites, or sites offering negative opinions or data regarding a political party member.
- **Pornography** - sites that offer video, images, or stories of sexual situations with the intent to encourage prurient interest.
- **Portal** - sites that offer a broad array of resources and services, such as email, forums, search engines. Portals often allow access to much material from many various sources/sites not under their control.
- **Proxies and Anonymizer** - sites which offer anonymous access to Web sites through a PHP or CGI proxy, allowing users to gain access to websites blocked by corporate and school proxies as well as parental control filtering solutions.
- **Reference** - sites which contain personal, professional, or educational references such as online dictionaries, encyclopedias, thesauri, Maps, Language translation sites.
- **Religion** - sites which are dedicated to mainstream religious institutions. These sites may include church sites, information regarding service times or location, or church event calendars. This category applies to such religions as Judaism, Mormonism, Christianity, Buddhism, and any other well-established religion. Also Web sites which discuss or advocate religion-based opinions and organizations.
- **Science** - sites which provide research materials in the natural and life sciences.
- **Search Engine (protected)** - sites which allow you to search the Internet and DO allow the enforcement of the "Safe Search" feature. This category would include all sub-URL's under the main site.
- **Search Engine (unprotected)** - sites which allow you to either search the Internet and DO NOT allow the enforcement of the "Safe Search" feature. This category would include all sub-URL's under the main site.
- **Self-Harm** - sites which describe or discuss ways in which to self harm including eating disorders and self injury.
- **Sexual Education** - sites which provide a wide range of information on reproduction and sexual development, prevention of sexually transmitted diseases, contraception methods, and sexual orientation issues.
- **Shopping** - sites which contain any type of online commerce. Shopping malls, online clothing stores, classifieds, and online trading/auction services.
- **Social Networking** - sites which offer a variety of tools and mechanisms to enable a group of people to communicate and interact via the Internet such Facebook, MySpace.
- **Sports** - sites which promote or provide information about spectator sports such as Professional sports teams, leagues, organizations, or association sites; player and fan sites, Collegiate

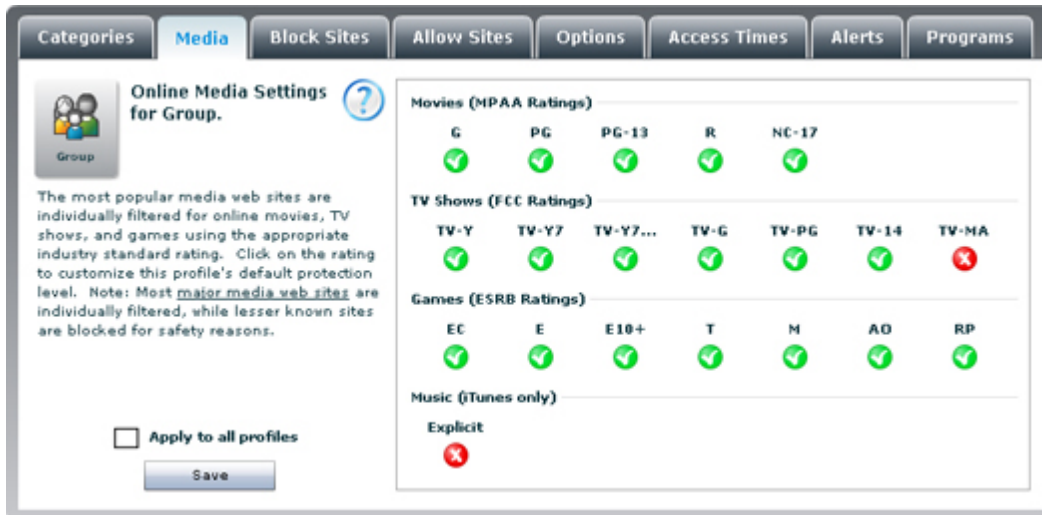

football, basketball, etc.; men's and women's; team, league, and conference sites; player and fan sites, sites for official Olympic Committees; media Olympic portals, Sports portals and directories - scores, schedules, news, statistics, discussion, etc.; spectator sports link aggregations, Sports event ticket sales for targeted professional or collegiate sports; sports tourism, Online magazines, newsletters, chats and forums for targeted professional and collegiate sports.

- **Suicide** - sites which describe or promote suicide such as Suggestions on how to kill yourself; newsgroups; chat rooms; message boards, Descriptions/depictions of methods/systems/machines; instructions, Personal stories; suicide diaries; blogs; forums, Famous suicides/details of famous suicides, Famous suicide spots, Glorification or worshipful attitude to suicide.
- **Technology** - sites which provide information pertaining to computers, the Internet as well as telecommunication such as Software solutions and services, Computer and telecommunication hardware, devices and gadgets, Internet and phone access services, Technology news.
- **Tobacco** - sites which encourage, promote, offer for sale or otherwise encourage the consumption of tobacco such as Retailers, Manufacturers/tobacco industry, Tobacco products and paraphernalia, Smoking is good/glamorous/cool etc., How to smoke/smoking lessons.
- **Travel** - sites which promote or provide opportunity for travel planning in a general sense, particularly finding and making travel reservations such as Travel portals, packages, and information (includes tours, travel clubs and associations, and travel information for specific demographic groups), Air travel (air carriers: tickets/reservations/charters).
- **Violence and Gore** - sites which advocate or provide instructions for causing physical harm to people or property through use of weapons, explosives, pranks, or other types of violence, such as Explosives and bombs: how to manufacture, obtain materials, transport, or seed an area, including but not limited to making explosives using common household items, Pranks, destructive mischief, "revenge," teenage anarchy including but not limited to dangerous chemistry, Descriptions or instructions for killing people.
- **Weapons** - sites which describe or offer for sale weapons including guns, ammunition, firearm accessories, knives and martial arts such as Online sales of firearms, ammunition, accessories, knives, etc. Descriptions, reviews, specifications or weapons, Weapons retailers, manufacturers, auctions, trading centers, Instructions for manufacture of weapons.
- **Webmail** - sites which offer free web-based email services.

4.2. Media

AVG Family Safety provides a means to further manage parental controls by controlling the accessibility of online media content.

This sub-tab is where you can restrict a profile's access to online media such as movies, TV shows, and games. Using industry standard ratings, the most popular media web sites (*ABC, NBC, CBS, FOX, TLC, MTV, BET, TNT, FX, Hulu, Fancast, Comedy Central & NetFlix*) are individually filtered, giving you the ability to control a profile's media access by the assigned media rating.

Please note that for safety reasons, less popular sites will be blocked.

Media marked as ✗ are **to be blocked**, those marked as ✓ are **to be allowed**.

MPAA Ratings for MOVIES:

- **G** - all ages admitted.
- **PG** - some material may not be suitable for children.
- **PG-13** - some material may be inappropriate for children under 13.
- **R** - under 17 requires accompanying by a parent or adult guardian.
- **NC-17** - no One 17 and Under Admitted

FCC Ratings for TV SHOWS:

- **TV-Y** - (All Children) Whether animated or live-action, the themes and elements in this program are specifically designed for a very young audience, including children from ages 2–6. These programs are not expected to frighten younger children.[2] Examples of programs issued this rating include Sesame Street, Barney & Friends, Dora the Explorer, Go, Diego, Go! and The Backyardigans.

- **TV-Y7** - (Directed to children 7 and older) These shows may or may not be appropriate for some children under the age of 7. This rating may include crude, suggestive humor, mild fantasy violence, or content considered too scary or controversial to be shown to children under seven. Examples include Foster's Home for Imaginary Friends, Johnny Test, and SpongeBob SquarePants.
- **TV-Y7-FV** - (Directed to children 7 and older [fantasy violence]) When a show has noticeably more fantasy violence, it is assigned the TV-Y7-FV rating. Action-adventure shows such as Digimon, the Pokémon series (after being transferred to Cartoon Network, where on Kids' WB it was formerly rated TV-Y) and Sonic X series are assigned a TV-Y7-FV rating.
- **TV-G** - (General audience) Although this rating does not signify a program designed specifically for children, most parents may let younger children watch this program unattended. It contains little or no violence, no strong language and little or no sexual dialogue or situation. Networks that air informational, how-to content or generally inoffensive content (such as the Food Network and HGTV) usually apply a blanket TV-G rating to all of their shows (unless otherwise noted). Shows directed to preteen and teens on Nickelodeon and Disney Channel are rated TV-G.
- **TV-PG** - (Parental guidance suggested) This rating signifies that the program may be unsuitable for younger children without the guidance of a parent. Many parents may want to watch it with their younger children. Various game shows and most reality shows are rated TV-PG for their suggestive dialog, suggestive humor, and/or coarse language. Some prime-time sitcoms such as Everybody Loves Raymond, Fresh Prince of Bel-Air, The Simpsons, Futurama (on Fox and adult swim airings), and Seinfeld usually air with a TV-PG rating.
- **TV-14** - (May be unsuitable for children under 14 years of age) Parents are strongly urged to exercise greater care in monitoring this program and are cautioned against letting children of any age watch unattended.
- **TV-MA** - (Mature audience — may be unsuitable for children under 17) The program may contain extreme graphic violence, strong profanity, overtly sexual dialogue, very coarse language, nudity and/or strong sexual content. Although not a very large number of shows carry this rating, The Sopranos is a popular example.

ESRB Ratings for GAMES:

- **EC (Early Childhood)** - may be suitable for ages 3 and older. Contains no material that parents would find inappropriate.
- **E (Everyone)** - may be suitable for ages 6 and older. Titles in this category may contain minimal cartoon, fantasy or mild violence and/or infrequent use of mild language.
- **E10+ (Everyone 10 and older)** - may be suitable for ages 10 and older. Titles in this category may contain more cartoon, fantasy or mild violence, mild language, and/or minimal suggestive themes.
- **T (Teen)** - may be suitable for persons ages 13 and older. Titles in this category may contain violence, suggestive themes, crude humor, minimal blood, simulated gambling, and/or infrequent use of strong language.

- **M (Mature)** - may be suitable for persons ages 17 and older. Titles in this category may contain intense violence, blood and gore, sexual content, and/or strong language.
- **AO (Adults Only)** - should only be played by persons 18 years and older. Titles in this category may include prolonged scenes of intense violence and/or graphic sexual content and nudity.
- **RP (Rating Pending)** - title has been submitted to the ESRB and is awaiting final rating. (This symbol appears only in advertising prior to a game's release).

How do I allow media?

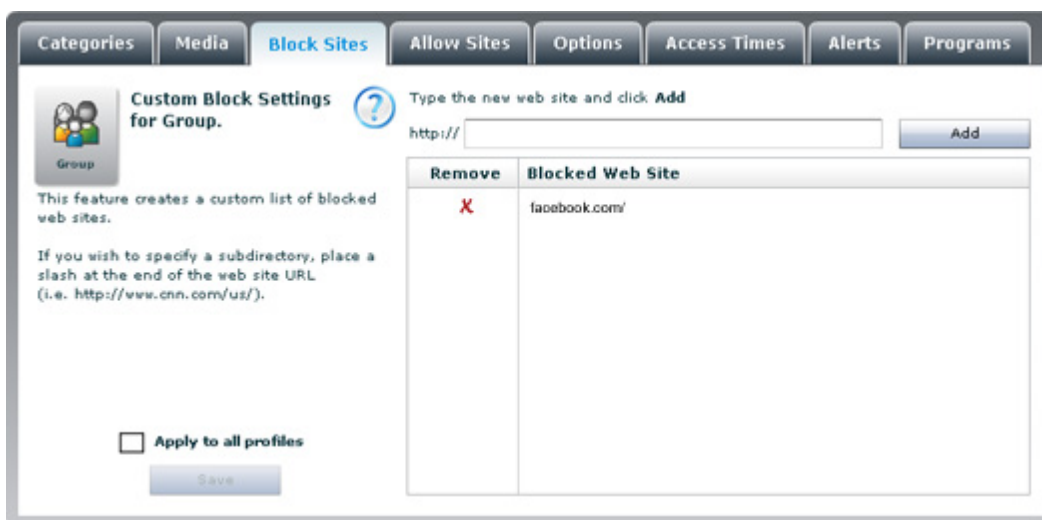

1. Select the **Parental Controls** tab from the "Services tabs".
2. Select the **Media** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify **Parental Controls** is turned on  for the selected profile.
5. Select the highest rating to be allowed. The selected rating and all ratings "below" (to the left of) the selection will automatically be included or allowed. Additionally, all ratings above (to the right of) the selection will be excluded or blocked. For example, if you elect to allow R rated movies, all the ratings listed to the left of "R" (i.e. PG-13, PG, and G) are automatically allowed as well.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

How do I block media?

1. Select the **Parental Controls** tab from the "Services tabs".
2. Select the **Media** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify **Parental Controls** is turned on  for the selected profile.
5. Select the rating to be blocked. The selected rating and all ratings "above" (to the right of) the selection will automatically be included or blocked.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

4.3. Block Sites

The **Block Sites** list is useful for blocking specific websites that may not fall under any of the **AVG Family Safety** categories. For example, you may have discovered that your child has been browsing a certain website that, although not necessarily obscene, find very distasteful. The filter has not blocked it, but you may do so by adding that web address to the Block Sites list.

How do I create a Block Sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Block Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. In the provided text box, type the URL of a website that you want to block.
6. Click **Add**. The website is added to the Blocked websites list.
7. Repeat steps 5 and 6 to add additional websites to your Block Sites list.
8. Click **Save** to preserve your settings. If you navigate away from this sub-tab before saving your changes, the **Save Changes** message appears. Please keep in mind that all changes made will be applied to the highlighted profile only.

How do I remove an entry from the Block Sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Block Sites** sub-tab.

3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. Click the red **X** next to the website entry.
6. **Repeat** for every website entry to be deleted.
7. Check the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

4.4. Allow Sites

The ability to create customized lists enables you to allow specific websites by URL and create White Lists (an approved list of websites to be allowed to display) if desired to control content filtering more specifically.

Remove	Allowed Web Site
X	facebook.com/

If there are no addresses listed in this window and the **Only allow...** box is checked, NO sites at all will be accessible except the hard-coded **AVG Family Safety** websites. If you are unable to access the Internet, it is helpful to make sure **Only allow sites listed in the Allowed list** box is not checked.

How do I create an allowed sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Allow Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. In the provided text box, type the URL of a website that you want to allow.

6. Click **Add**. The website is added to the Allow sites list.
7. Repeat steps 5 and 6 to add additional websites to your Allow sites list.
8. Click **Save** to preserve your settings.

How do I remove an entry from the allowed sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Allow Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Click the red **X** next to the website entry.
6. **Repeat** for every website entry to be deleted.

A white list is a list of websites that are authorized to display. If this option is selected, the selected user profile will only be able to navigate to the Web sites on the Allowed Web sites list.

How do I create a white list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Allow Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Select the **Only allow sites listed in the Allowed list** box below the Allowed Web sites list. A check mark indicates that the "white list" feature is turned on. [Block Sites](#) feature on the [Options sub-tab](#) must be turned on in order for this feature to be active. The selected profile will only be able to navigate to websites on this list.

4.5. Options

This sub-tab allows you to manage the following key filter settings for your profiles:

- [Block / Warn / Monitor](#) - allows you to establish the internet permissions level for your profiles.
- [Password Override](#) - allows you to temporarily unblock Web sites or add them to your [Allow Sites](#) list by providing your administrative or secondary password.

- [Secondary Password](#) – allows you to create a secondary password for non-administrative users.
- [Safe Search](#) - allows you to manage the built-in safe search feature of the Google, Yahoo, and Bing search engines for each of your profiles.
- [Safety Lock](#) - allows you to disable Internet access after a certain number of sites have been blocked.
- [File Extension Blocking](#) - allows you to block Web pictures and various media files that display on good sites but are linked to objectionable sites.
- [iCat](#) - allows you to activate the filters second line of defense against uncategorized sites.

4.5.1. Block / Warn / Monitor

Use this feature to manage and control access to blocked sites for your profiles. The following permission levels are available:

- **Block sites** - the strictest setting. The user will have restricted internet access based on filter settings such as, [Categories](#), [Allow Sites](#), [Block Sites](#), etc. A Block page will allow password override if the override feature is turned on. [Password override](#) will allow the user to open the blocked Web site by entering either the administrative or secondary password.

Please verify that the **Parental Controls** feature is turned on ON.

- **Warn, but allow access and monitoring** - the "selected profile" will have unrestricted internet access, but will receive a warn page before navigation to websites in blocked categories. The warn page, will give the option to go "back" or "continue" on to display potentially unwanted content.

Please keep in mind that this option will still block websites in the [Block Sites](#) list. Also make sure that the Parental Controls feature is turned on ON.

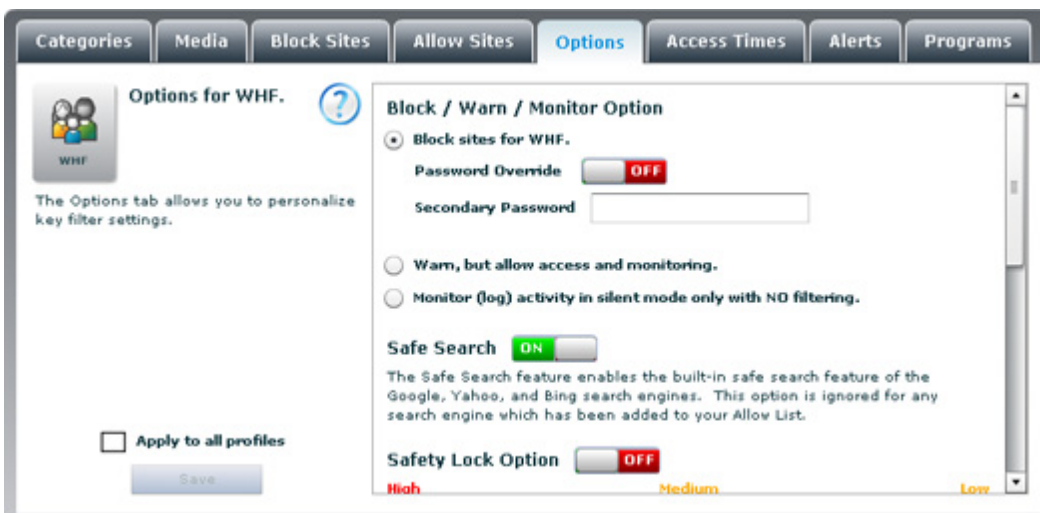

- **Monitor (log) activity in silent mode only with NO filtering** - the "selected profile" will have unrestricted internet access and will not receive block or warn pages.

4.5.2. Password Override

With Password Override enabled, you have two additional options to further manage internet access for your user settings:

- **Option 1:** When the Block page comes up for any URL, the Password Override feature allows you to grant access to the blocked URL by entering the administrative or secondary password. Access will be granted to the URL until the next time the computer is restarted.
- **Option 2:** When the Block page comes up for any URL, the Password Override feature also allows you to add the URL to your allow list. Select the check box located to the right of the password entry box.

How do I turn on the Password Override feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. **Drag the scroll bar** to show the "Password" option in the window provided. The default setting for this feature is ON. If it is disabled, click the red OFF  indicator to display the green ON . The Password Override feature is now enabled.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

4.5.3. Secondary Password

This option allows you to create an alternate password for your established profiles to use for overriding blocked Web content. This feature can be used to give your profiles temporary access to blocked content without compromising the administrative password. The administrator is able to create a different secondary password for each profile and it can be changed as often as is desired.

How do I create a secondary password?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.

5. **Drag the scroll bar** to show the "Password" option in the window provided. The default setting for this feature is ON. If it is disabled, click the red OFF  indicator to display the green ON . The Password Override feature is now enabled. Enter a secondary password into the **text box** provided.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

4.5.4. Safe Search

This feature allows you to manage the built-in safe search feature of the Google, Yahoo, and Bing search engines. The search engine's safe search is designed to filter out explicit, adult-oriented content from the engines' search results. The listed search engines have three settings for their safe search options (These settings must initially be set in the individual search engines):

- **Strict** – Filters out adult **text, images, and videos** from your search results.
- **Moderate** – Filters adult **images and videos** but not text from your search results.
- **Off** – no filtering of the search results.

Please note that in order to use the Safe Search feature, the appropriate search engine category must be selected. Choose either:

- Search Engine (protected) – to Allow safe search filtering or
- Search Engine (unprotected) – to Not Allow safe search filtering.

Also keep in mind that the Safe Search option is ignored for any search engine which has been added to your [Allow List](#).

How do I turn on the Safe Search feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. **Drag the scroll bar** to show the "Safe Search" option in the window provided. The default setting for this feature is ON. Click the red OFF  indicator to display the green ON . The Safe Search feature is now enabled.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.
7. Select the [Categories sub-tab](#), verify that the **Search Engine (unprotected)** category is "blocked"  and that **Search Engine (protected)** is "allowed" .

8. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears.

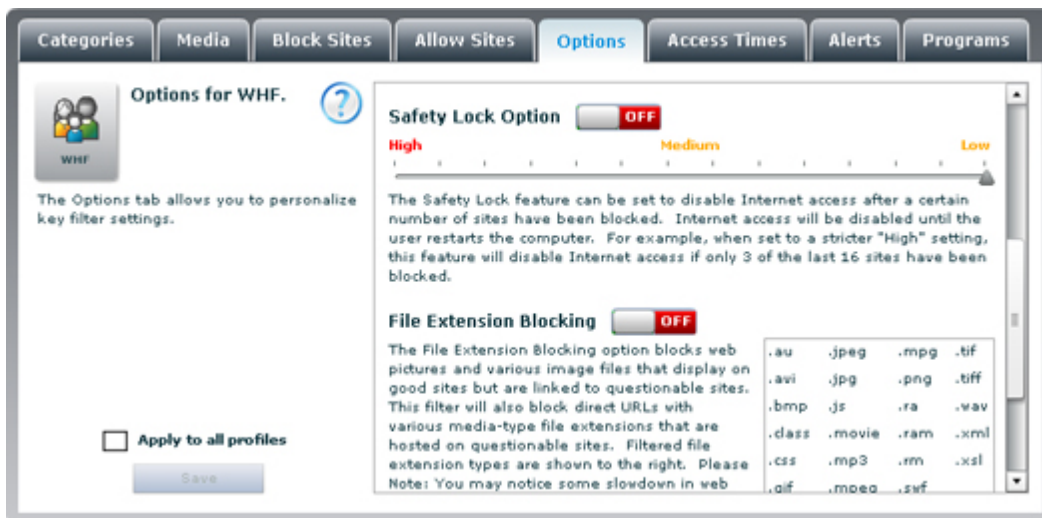

How do I turn off the Safe Search feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. **Drag the scroll bar** to show the "Safe Search" option in the window provided. The default setting for this feature is ON. Click the green ON  indicator to display the green OFF .
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.
7. Select the [Categories sub-tab](#), verify that the **Search Engine (unprotected)** category is "allowed"  and that **Search Engine (protected)** is "blocked" . The Safe Search feature is now disabled.
8. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears.

4.5.5. Safety Lock

This feature is used to protect against users accessing multiple blocked sites. This feature prevents attempts to bypass the Content Filter by forcing the user to restart the computer after a specified number of attempts result in blocked pages. For example, when set to a stricter "High" setting, this feature will disable Internet access if only 3 of the last 16 sites have been blocked. The number displayed as the slider is moved indicates the number of sites blocked before internet access is disabled.

How do I turn on and adjust the Safety Lock feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. **Drag the scroll bar** to show the "Safety Lock" option in the window provided. The default setting for this feature is OFF. Click the red OFF indicator to display the green ON . The Safety Lock feature is now enabled.
6. Click and slide (see the picture below) the marker sideways to adjust the setting. Sliding the marker to the left increases the setting for a stricter setting.
7. Click **Save** to preserve your settings.

How do I turn off the Safety Lock feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on **ON** for the selected profile.
5. **Drag the scroll bar** to show the "Safety Lock" option in the window provided. Click the green **ON** indicator to display the green **OFF** .

4.5.6. File Extension Blocking

This feature blocks Web pictures and various media files that display on good sites but are linked to objectionable sites. This filter will also block direct URLs with various media-type file extensions that are hosted on objectionable sites. The filtered file extensions are:

.au	.avi	.bmp	.class
.css	.gif	.jpeg	.jpg
.js	.movie	.mp3	.mpeg
.mpg	.png	.ra	.ram
.rm	.swf	.tif	.tiff
.wav	.xml	.xsl	

Please keep in mind that when turned on, File Extension Blocking will block all of the listed extensions. You may notice some slowdown in Web browsing when utilizing File Extension Blocking.

How do I turn on the File Extension Blocking?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on **ON** for the selected profile.
5. **Drag the scroll bar** to show the "File Extension Blocking" option in the window provided. The default setting for this feature is OFF. Click the red OFF **OFF** indicator to display the green ON **ON**. The File Extension Blocking feature is now enabled.
6. Click **Save** to preserve your settings.

4.5.7. iCat

The patent pending iCat (Intelligent Contextual Analysis Technology) feature provides a second line of defense to further protect our users from the dangers of the web. On the rare occasion when a web page is not categorized in our databases, the iCat capability will evaluate the web page, its content and its links to make sure it is not a threat. The feature is turned on by default and can be disabled easily by switching it to off.

How do I turn on the iCat feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. **Drag the scroll bar** to show the "iCat" option in the window provided. The default setting for this feature is ON. Click the red OFF  indicator to display the green ON . The File Extension Blocking feature is now enabled.
6. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the Save **Changes message** appears. Of course, all changes made will be applied to the highlighted profile only.

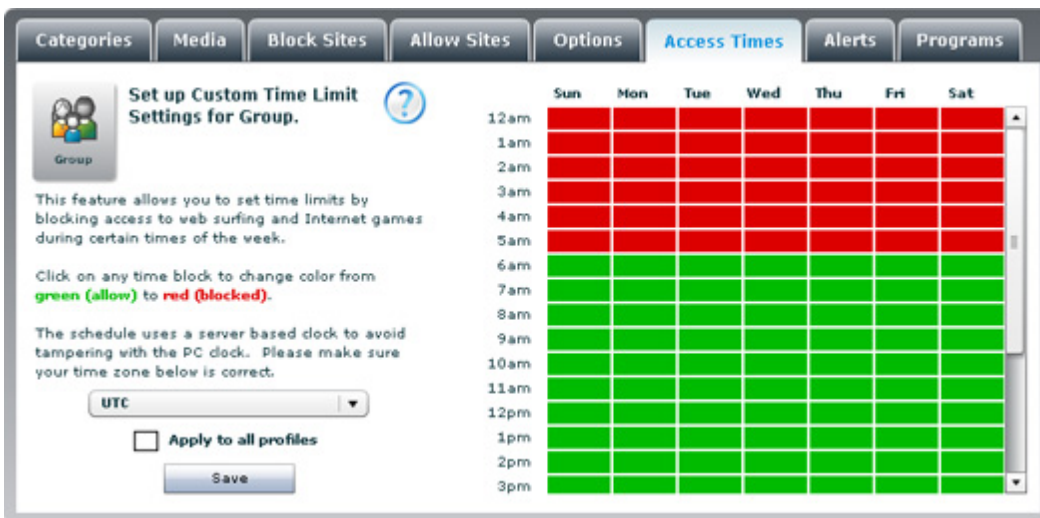

How do I turn off the iCat feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Drag the scroll bar to show the "iCat" on / off switch in the window provided. The iCat feature is on when the green ON  indicator is displayed. Click the ON switch to change the indicator to a red OFF . The iCat feature is now disabled.
6. Click **Save** to preserve your settings. If you navigate away from this section before saving

your changes, the **Save Changes** message appears. Of course, all changes made will be applied to the highlighted profile only.

4.6. Access Times

This feature allows you to set time limits for your profiles by blocking access to Web surfing and Internet games during certain times of the day for each day of the week.

How do I restrict Internet access times?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Access Times** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. Select your time zone from the drop down list:

6. Click the time block to change the color. **Green** blocks indicate times that are **allowed** and **red** blocks indicate times that are **blocked**. To select multiple time blocks, click in the initial time block and drag your mouse across the desired blocks.
7. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears.

4.7. Alerts

Using this feature, parents can receive alerts via e-mail and/or text messaging (SMS) whenever a user attempts to access a website categorized as **pornography** or when **keywords** or **phrases** are used on a website categorized as a social site. This feature is enabled by default with all alerts sent to the email address used during registration until alternate information is provided.

Categories Media Block Sites Allow Sites Options Access Times **Alerts** Programs

Set up Parent Alerts for Group. ON

Parents and Accountability partners may receive text (SMS) and email alerts when blocked sites are accessed. When Social Network Monitoring is active, alerts will also be sent when matching content is posted. *Bsecure does not charge for messages. Check with your mobile carrier for possible fees.

7-11 Speakout (US)

Send test message
 Apply to all profiles

How do I turn alerts off?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on ON for the selected profile.
5. The default setting for this feature is ON. Click the green ON indicator ON to display the red OFF OFF. The Alerts feature is now disabled.

How do I setup text (SMS) alerts?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that both **Parental Controls** and **Parent Alerts** are turned on ON for the selected profile.

5. Enter a mobile phone number in the text box provided under the mobile number section. Be sure to include the area code.
6. Select your mobile carrier from the list provided.
7. Click the **Add** button to add the number to your mobile number list.

To add an SMS number, type it in here, then click **Add**

<input type="text"/>	7-11 Speakout (US) ▼	<input type="button" value="Add"/>
----------------------	----------------------	------------------------------------

8. Repeat steps 5 thru 7 for each mobile number that you would like to setup.
9. Select the **Send test message** box in order to verify your SMS alerts setup. Keep in mind that SMS alerts are sent out in one minute intervals. Please allow at least one minute between each test.
10. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears. All changes made will be applied to the highlighted profile only.

How do I setup email alerts?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that both **Parental Controls** and **Parent Alerts** are turned on **ON** for the selected profile.
5. Enter the email address in the text box provided under the email address section.
6. Click the **Add** button to add the email address to your list of email addresses.

To add an e-mail address, type it in here, then click **Add**

<input type="text"/>	<input type="button" value="Add"/>
----------------------	------------------------------------

7. Repeat steps 5 and 6 for each mobile number that you would like to setup.
8. Select the **Send test message** box in order to verify your email alerts setup.
9. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears. All changes made will be applied to

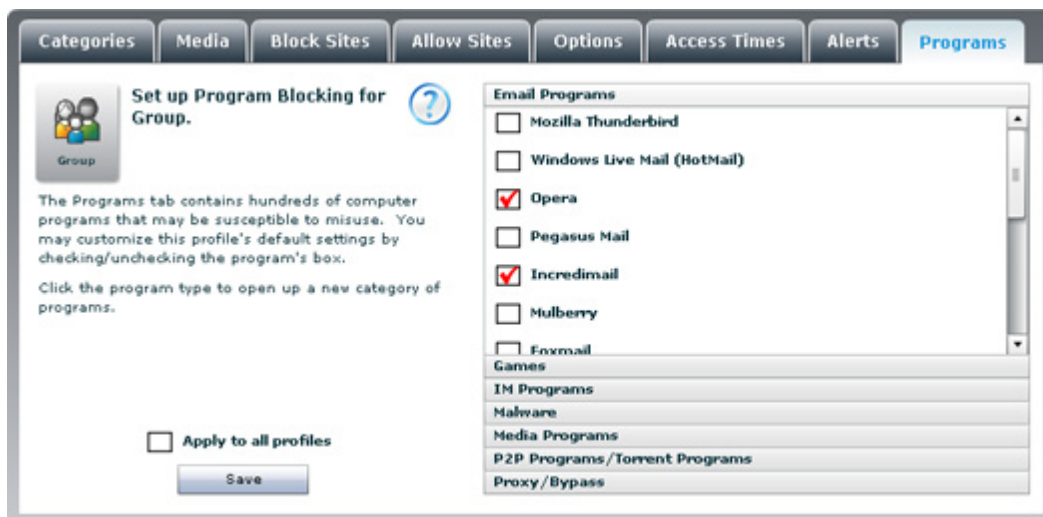

the highlighted profile only.

4.8. Programs

This sub-tab is where you manage access to certain programs on your PC. By selecting from a predefined list, you can determine whether to block or allow the programs.

- **IM Programs** - programs that make possible a form of real-time communication between two or more people by way of typed text. Outlook Express.

How do I block access to selected programs on my PC?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Programs** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Click the **blue bar** to open the listed program category.
6. Click the **box** next to the program you would like to block. A checked box indicates active blocking of the listed program for the current user setting.
7. Click **Save** to preserve your settings. Please keep in mind that blocking one of these applications prevents the application from running, connecting to the Internet and sending out sensitive or other data from your computer. It does **not** prevent the download or installation of the application.

5. How can I...

5.1. ...add a new profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the **Add profile** link, this will open the "create new settings profile" panel.
3. Enter a name for the new profile (**required**).
4. Enter a brief description for the new profile (optional).
5. Select an age group from the **age template initial settings** drop down menu.
6. Select the icon you would like to use for the new profile. The icons can be displayed by groups, male, female, adult, teens, youth, and child. *For example, you can choose to only view male - teen icons.*
7. Click the **Save** button to save your new profile.

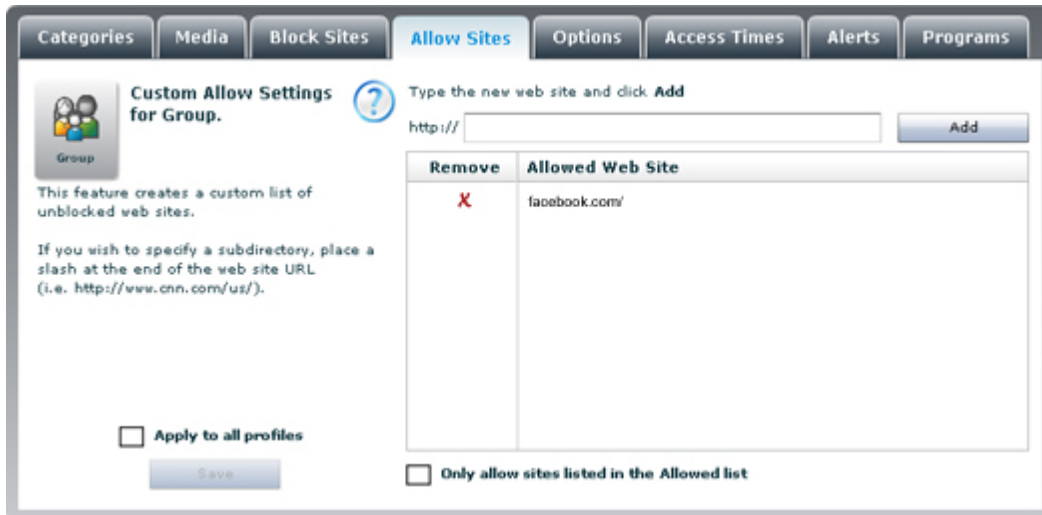

5.2. ...add a site to the allow sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Allow Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. In the provided text box, type the URL of a website that you want to allow.

6. Click **Add**. The website is added to the Allow sites list.
7. Repeat steps 5 and 6 to add additional websites to your Allow sites list.
8. Click **Save** to preserve your settings.

5.3. ...add a site to the block sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Block Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. In the provided text box, type the URL of a website that you want to block.
6. Click **Add**. The website is added to the Blocked websites list.
7. Repeat steps 5 and 6 to add additional websites to your Block Sites list.
8. Click **Save** to preserve your settings. If you navigate away from this sub-tab before saving your changes, the **Save Changes** message appears. Please keep in mind that all changes made will be applied to the highlighted profile only.

5.4. ...apply changes to all profiles?

1. Select the **Parental Controls** from the "Services tabs".
2. Select the "Feature tab" to modify (i.e. Categories, Media, Block Sites, Allow Sites, Options, Access Times, Alerts or Programs).
3. Select the profile that you would like to manage.
4. Make the desired changes to the profile's settings.
5. Select the **Apply to all profiles** check box located on each of the Parental Control "Feature Tabs."
6. Click **Save** to preserve your changes.
7. Click **Yes** to confirm.

Please note that the "Apply to all" option will overwrite the previous settings for every profile. For example, if you add a site to a profile's allow sites list and you elect to "Apply to all," this option does not just add the change to other profiles, the entire allow list settings will be applied and will replace the existing allow list settings for every profiles.

5.5. ...assign a profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the **Assign profile** link.
3. Now you can see all the manageable devices and their logins. Select the device from the list, then click the drop down arrow next to the corresponding system / device login to select & assign one of the established profiles (available profiles will be visible in the profile management section).

4. Click the **Save** button to preserve your changes.

5.6. ...assing a profile for Whole Home Filtering?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the **Whole Home Filtering** link; this will open the "Whole Home Filtering" panel.
3. Click the red OFF indicator OFF to display the green ON ON. The WHF feature is now enabled.
4. Choose the profile setting that you would like to assign to the WHF network. This can be any of the already established profiles or you can create a "new" profile specifically for your WHF. Use the add profile link to create a new profile.
5. Enter your username and password for your home network's router.
6. Click **Save** to preserve your settings.

It is recommended that you create an **exclusive WHF profile** for managing your network's filter settings. ***If you change routers, you will need to reestablish your WHF settings.***

5.7. ...block access to selected programs on my PC?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Programs** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Click the **blue bar** to open the listed program category.
6. Click the **box** next to the program you would like to block. A checked box indicates active blocking of the listed program for the current user setting.
7. Click **Save** to preserve your settings. Please keep in mind that blocking one of these applications prevents the application from running, connecting to the Internet and sending out sensitive or other data from your computer. It does **not** prevent the download or installation of the application.

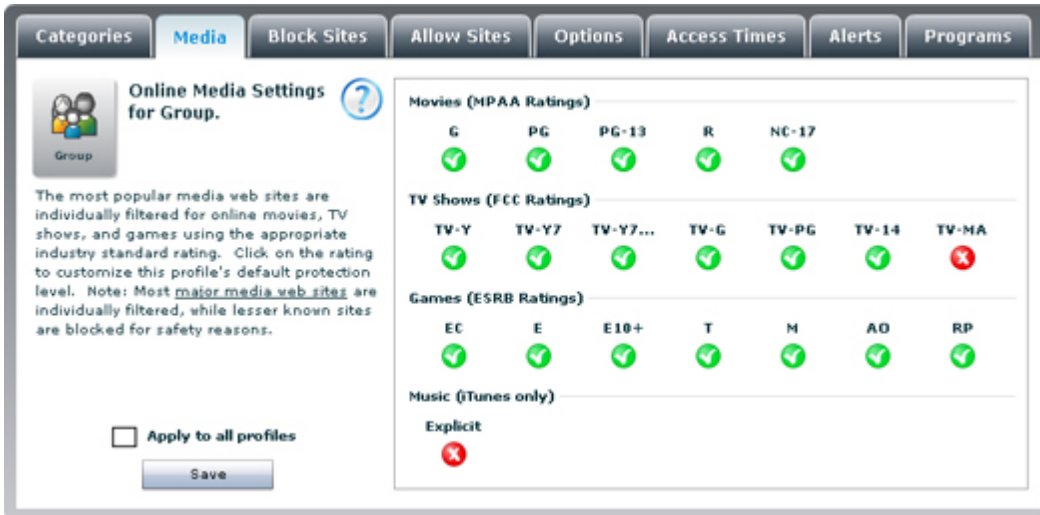

5.8. ...block explicit music (iTunes only)?

1. Select the **Parental Controls** tab from the "Services tabs".
2. Select the **Media** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Under Music, select the green check mark  to change it to . Explicit music will now be blocked for the selected profile, **in iTunes only**. The default setting for this feature is ON .

6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings. If you navigate away from this sub-tab before saving your changes, the **Save Changes** message appears.

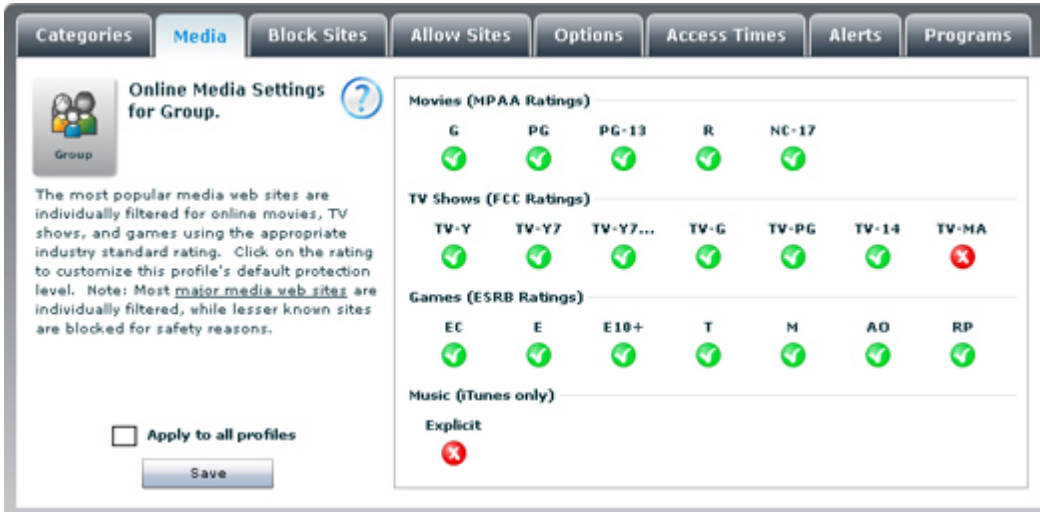

Media marked as are **to be blocked**, those marked as are **to be allowed**.

5.9. ...block media using ratings?

1. Select the **Parental Controls** tab from the "Services tabs".
2. Select the **Media** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify **Parental Controls** is turned on for the selected profile.
5. Select the rating to be blocked. The selected rating and all ratings "above" (to the right of) the selection will automatically be included or blocked.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

Media marked as are **to be blocked**, those marked as are **to be allowed**.

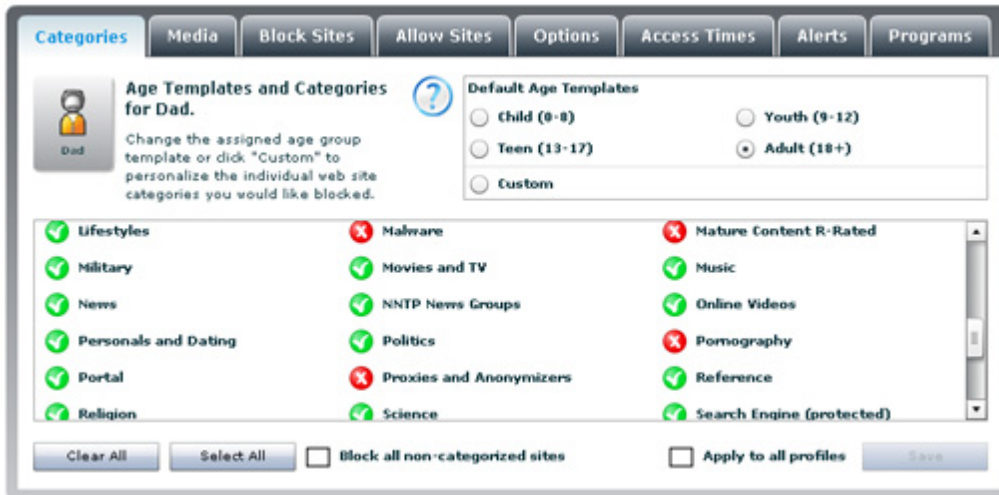

5.10. ...block uncategorized websites?

1. Select **Parental Controls** from the "Services tabs."
2. Select the **Categories** tab (if it is not already selected).
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned ON for the selected profile.
5. To block all unknown and non-categorized sites, select the check box located below the categories list. A check mark indicates that this feature is turned on.

Block all non-categorized sites

6. Select the "Apply to all profiles" box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

5.11. ...create a limited user account?

1. Login to Windows as an administrator.
2. Click **Start** and then select the **control panel**.
3. Click on **User accounts**.
4. Depending on the version of Windows running on your machine, select **Pick a task/Create new account** or the **Add** button.
5. Type in the **username** and click **Next**.
6. Select **limited** or **restricted** user.
7. Click **Create account** or finish.

5.12. ...create a secondary password?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on for the selected profile.
5. **Drag the scroll bar** to show the "Password" option in the window provided. The default setting for this feature is ON. If it is disabled, click the red OFF indicator to display the green ON . The Password Override feature is now enabled. Enter a secondary password into the **text box** provided.
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings.

5.13. ...create a white list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Allow Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Select the **Only allow sites listed in the Allowed list** box below the Allowed Web sites list. A check mark indicates that the "white list" feature is turned on. [Block Sites](#) feature on the [Options sub-tab](#) must be turned on in order for this feature to be active. The selected profile will only be able to navigate to websites on this list.

5.14. ...edit a profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the profile that you would like to edit.
3. Click the  icon in the upper left corner of the selected profile.
4. Enter a new name and/or brief description for the profile.
5. Click the **Save** button to preserve your changes.

Edit Profile

Please enter a name for this settings profile

Please enter a brief description

Please select an icon All All

5.15. ...login to a profile's social site account?

1. Double click the **AVG Family Safety** desktop  or system tray  icon. EN 5:26 AM
2/17/2011
2. Enter your login information to access the control panel.
3. Select **Activity Monitoring** from the "Services tabs".
4. Select the **Social Sites** sub-tab.
5. Select the profile that you would like to manage.
6. Verify that the feature is ON ON .
7. Click the corresponding link under **User Name**, for the site that you would like to access.

Summary	All Sites	Social Sites	Searches	Instant Messages	Programs	Alert Log
This powerful feature gives parents access to Group's accounts. Click on a 'User Name' link to login. <input checked="" type="checkbox"/> ON <input type="checkbox"/>						
Last Login	Site	User Name	Remove			

5.16. ...manually setup my router for WHF Services

1. Open the preferences for your router (**Only do this when connected to the Internet through your home network router**).
 - a) often, the preferences are set in your web browser, via a URL with the routers IP address which is represented by numbers (example: http://192.168.0.1). You may need to enter a password.

Please note that if you set the router password long ago and cannot remember it now, you can often reset the password to the manufacturer default by pressing a button on the router itself.
 - b) preferences may be also set via specific application for your router, which you installed on your computer when you added the router.
2. **Find** the DNS server settings: scan for the letters DNS next to a field which allows two or three sets of numbers, each broken into four groups of one to three numbers. It might look like this:

64	158	219	100
64	158	219	100

3. **Write down your current settings** before entering the AVG Family Safety DNS addresses, just in case you should ever want to change them back.
4. Enter the following **AVG Family Safety** DNS server addresses as your DNS server settings:

165	193	49	87
174	78	110	87

5. Select **Save** or **Apply**.

5.17. ...monitor a profile in silent mode?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. From the **Block / Warn / Monitor** section, select the "*Monitor (log) activity in silent mode only with NO filtering.*"
6. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings. If you navigate away from this sub-tab before saving your changes, the **Save Changes** message appears.

Please note that the selected profile will have unrestricted internet access and will not receive block or warn pages.

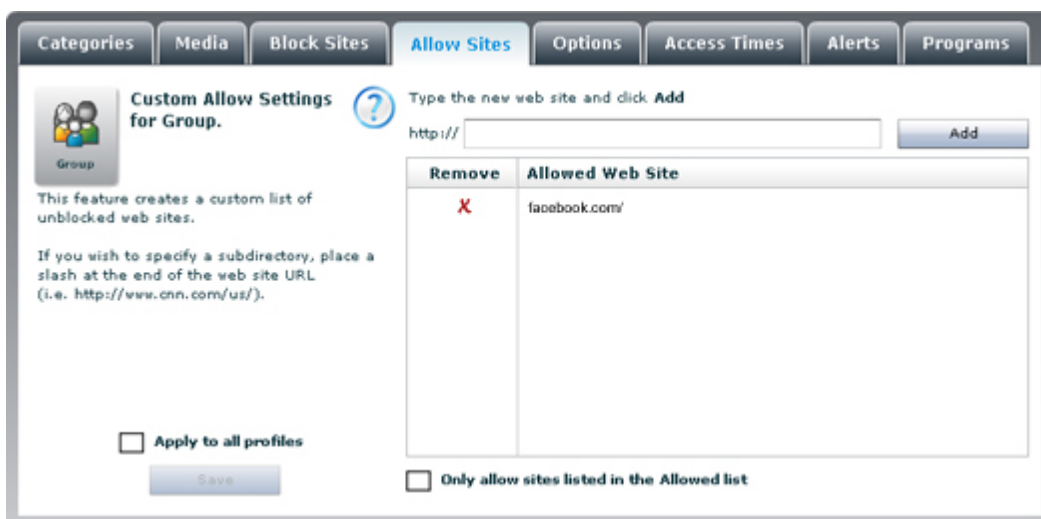

5.18. ...remove a profile?

1. Select either the **Activity Monitoring** or **Parental Controls** tab from the "Services tabs".
2. Select the profile that you would like to remove. Please keep in mind that the administrative profile cannot be removed. However, it can be renamed by clicking on the icon, located in the top left corner of the selected profile.
3. Select the red **X** in the upper right corner of the profile's icon.
4. Click the **Yes** button to confirm the deletion of the selected profile.

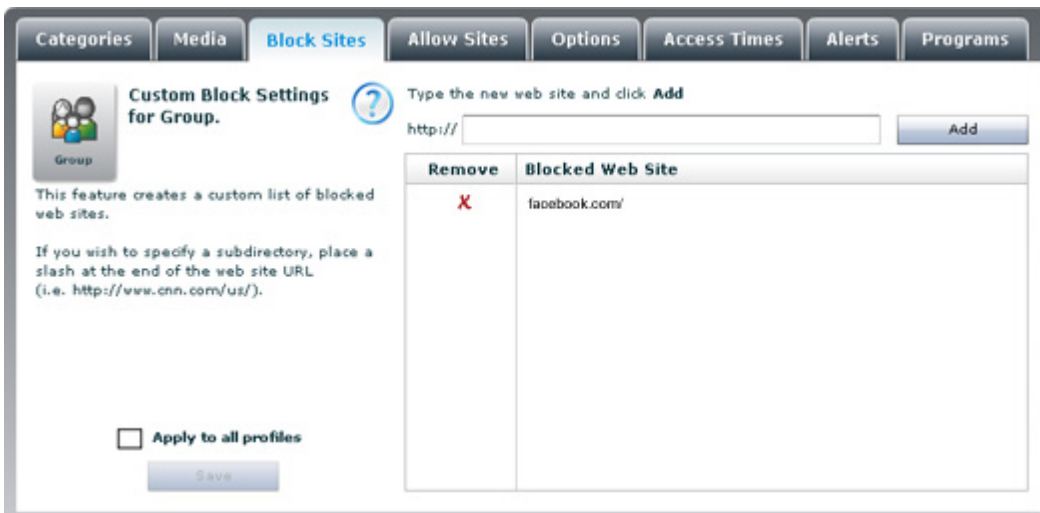

5.19. ...remove a site from the allow sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Allow Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Click the red **X** next to the website entry.
6. **Repeat** for every website entry to be deleted.

5.20. ...remove a site from the block sites list?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Block Sites** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Click the red **X** next to the website entry.
6. **Repeat** for every website entry to be deleted.

5.21. ...restrict Internet access times?

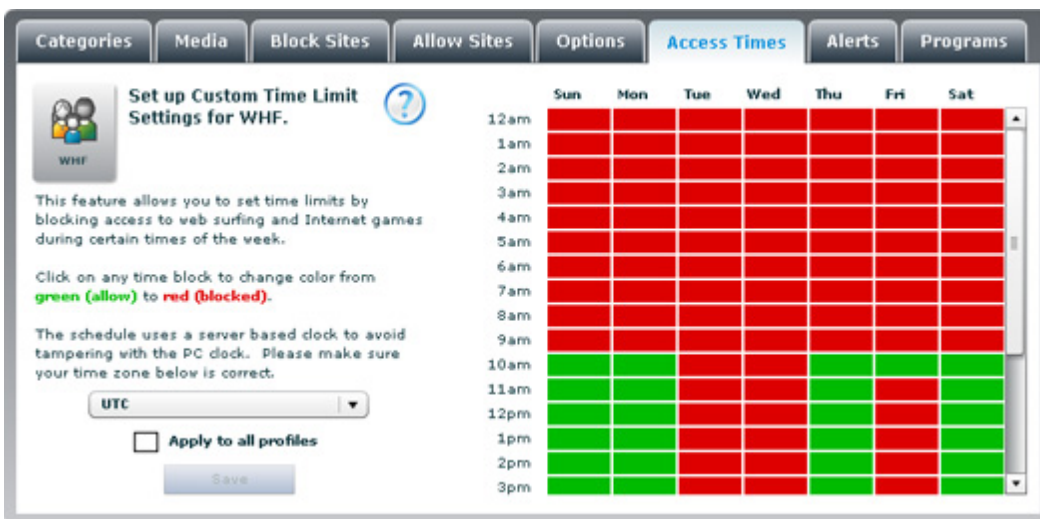

1. Select **Parental Controls** from the "Services tabs".
2. Select **Access Times** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
5. Select your time zone from the drop down list:

The schedule uses a server based clock to avoid tampering with the PC clock. Please make sure your time zone below is correct.

Central Time (US & Canada) ▼

6. Click the time block to change the color. **Green** blocks indicate times that are **allowed** and **red** blocks indicate times that are **blocked**. To select multiple time blocks, click in the initial time block and drag your mouse across the desired blocks.
7. Select the **Apply to all profiles** box if you would like the changes applied to all of your established profiles. Click **Save** to save your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears.

5.22. ...setup email alerts?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that both **Parental Controls** and **Parent Alerts** are turned on for the selected profile.
5. Enter the email address in the text box provided under the email address section.
6. Click the **Add** button to add the email address to your list of email addresses.

To add an e-mail address, type it in here, then click **Add**

7. Repeat steps 5 and 6 for each mobile number that you would like to setup.
8. Select the **Send test message** box in order to verify your email alerts setup.
9. Click **Save** to preserve your settings. If you navigate away from this section before saving your

changes, the **Save Changes** message appears. All changes made will be applied to the highlighted profile only.

5.23. ...setup text (SMS) alerts?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Alerts** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that both **Parental Controls** and **Parent Alerts** are turned on  for the selected profile.
5. Enter a mobile phone number in the text box provided under the mobile number section. Be sure to include the area code.
6. Select your mobile carrier from the list provided.
7. Click the **Add** button to add the number to your mobile number list.

To add an SMS number, type it in here, then click **Add**

<input type="text"/>	7-11 Speakout (US) ▼	Add
----------------------	----------------------	------------

8. Repeat steps 5 thru 7 for each mobile number that you would like to setup.
9. Select the **Send test message** box in order to verify your SMS alerts setup. Keep in mind that SMS alerts are sent out in one minute intervals. Please allow at least one minute between each test.
10. Click **Save** to preserve your settings. If you navigate away from this section before saving your changes, the **Save Changes** message appears. All changes made will be applied to the highlighted profile only.

5.24. ...turn off Activity monitoring?

1. Double click the **AVG Family Safety** desktop  or system tray  icon. 
2. Enter your login information to access the control panel.
3. Select the **Activity Monitoring** tab from the "Services tabs".
4. Select the profile that you would like to view.
5. Click the green ON  indicator to display the red OFF . The **Activity Monitoring** feature is now disabled for the selected profile.

The screenshot shows the AVG Family Safety web interface. At the top, there is a navigation bar with the AVG logo, the text 'Family Safety', and links for 'test@hotmail.com', 'My Account', 'Preferences', 'Help', and 'Logout'. Below this, there are two main tabs: 'Activity Monitoring' (selected) and 'Parental Controls'. Under 'Activity Monitoring', there are sub-tabs for 'Add Profile', 'Assign Profiles', and 'Whole Home Filtering'. A toggle switch indicates 'Activity Monitoring for the selected profile is ON'. Below the sub-tabs, there are four profile icons: 'Group', 'WHF', 'Dad', and 'Mom'. The main content area has a 'Summary' tab selected, with other tabs for 'All Sites', 'Social Sites', 'Searches', 'Instant Messages', 'Programs', and 'Alert Log'. The 'Summary' section contains three charts: 'Most visited Websites' (a list of URLs), 'Blocked Categories' (a pie chart showing Malware at 33% and Mature Content R-Rated at 67%), and 'Most visited Website Categories' (a horizontal bar chart showing Dynamic (177 hits), Technology (272 hits), and Free Host Sites (768 hits)). There is also a 'Blocked Websites' section listing 'adultcontent.com' and 'warezonthenet.com'.

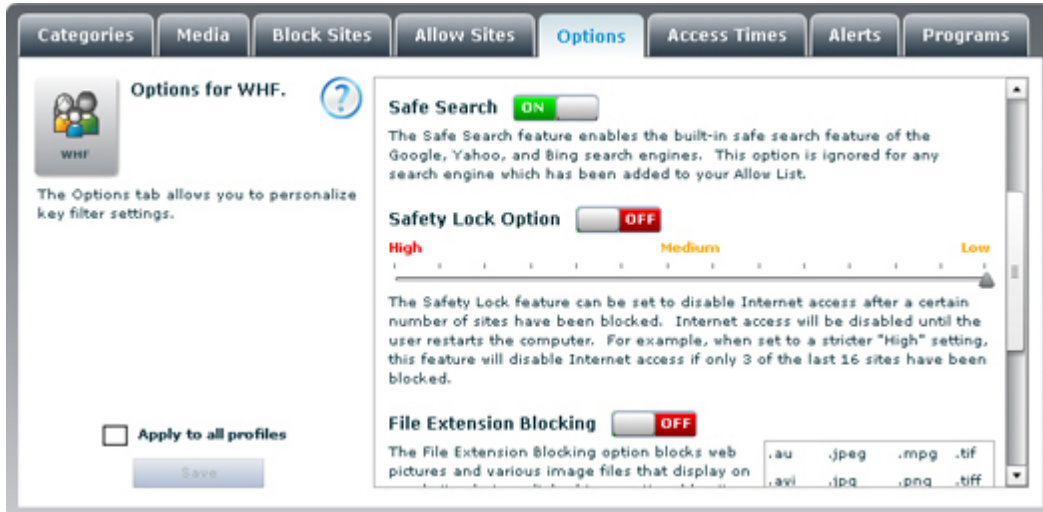

5.25. ...turn off iCat feature?

1. Select **Parental Controls** from the "Services tabs".
2. Select **Options** sub-tab.
3. Select the **profile** that you would like to manage.
4. Verify that **Parental Controls** is turned on  for the selected profile.
